Ansari,2023-07-09 If every action is predestined how can humans have free will Is the theory of evolution compatible with the story of Adam and Eve Why does a merciful God allow suffering Can God create an immovable stone He cannot move If every entity has a creator who created God Does this book really answer these centuries old paradoxes Yes it does A close study of the Quran reveals that the human way of thinking and logic used in the Quran differ in many key areas This book uses logic from the Quran to explain these paradoxes The solutions do not contradict Islamic beliefs or scientific facts In addition this book does not draw on philosophical traditions and therefore is easy to understand To enhance the reading experience the book incorporates colors and graphics Here is one example The Quran mentions the name of and praises Mary mother of Prophet Jesus PBUH The Quran even has a chapter titled Mary But the Quran does not include the names of Prophet Muhammad PBUH grandmothers mother wives daughters and granddaughter This includes his granddaughter born during the Prophet s lifetime Why are their names missing Only Allah knows This is not the way humans typically think The theory of evolution is discussed without rejecting scientific evidence How can the Quran the Word of Allah contradict science which is knowledge given by Allah For people with curious minds from any religion Skeptic Simple Answers Using Quran and Science has something special to offer explanations to some of the most enduring and puzzling paradoxes in history This book would be an excellent addition to a school or college curriculum **A Scientific Approach to the Quran** Mahmood Jawaid,2016

spiritual ethos to science This study will not delve into matters of religious nature Moreover it demonstrates to the already
believers that faith is tangible not visionary or priggish thus helps augmenting their faith Scientists have discovered the laws
which govern the wondrous work of God by asking questions and trying to find answers Prophets prior to God's revelation
and prophet hood were as curious as scientists and kept asking similar questions which were largely about creation However

- 1 Authenticity It is written in Arabic a viable language of the Arab world where Islam is the dominant religion and where Prophet Muhammad was born bred and preached his message Qur an was recited by him heart learnt by his followers and was scripted during his life
- 2 Uniformity It has a singular undisputed transcript that had never been challenged or changed since Prophet Muhammad recited it and it has the same spelling pronunciation punctuation and grammar since
- 3 Consistency Qur an is still recited in Arabic for worshipping purposes prayers sermons rituals and clerical functions by both Arab and non Arab Muslims which had prevented any distortion that might have resulted from translation
- 4 Comprehensiveness It was revealed six centuries after the Bible and had addressed a different kind of community and creed who were better cultivated and it had tackled more diverse issues regarding creation life and socio economico political problems There will inevitably be some discrepancy with the classical Tafsirs commentaries because they were written many centuries ago and of course without the benefit of the scientific discoveries and knowledge that we now have Qur an like other divine books had imparted knowledge either explicitly in an overt form especially that which had already been mentioned in previous divine books or implicitly either in a covert metaphoric manner or symbolically This had simplified God s message taking into consideration the vulnerability suspicion and inability of most people at that time to understand and assimilate this had simplified God s message The knowledge which was enshrined in Qur an has been scientifically analyzed in this study which couples scientific data with the relevant Qur anic verses which they identify with One objective of this book is looking at faith from a new perspective as being a conscious mental act of belief and conviction to awe of God based on a contextually scientific argument Secondly highlighting the concordance of divine books Qur an as one example with science and explaining alleged discordance which is mostly due to limitations of scientific research Thirdly it refutes the allegation that Qur an was written by mortals i e illiterate Muhammad or his disciples or companions simply because the information was unknown to mankind then
