**Cultural Influences on Architecture** Koç, Gülşah, Claes, Marie-Therese, Christiansen, Bryan, 2016-10-19 A society's culture is a contributing factor to the structure and design of its architecture As contemporary globalism brings about the evolution of the world architectural style evolves along with it which can be observed on an international scale Cultural Influences on Architecture is a pivotal reference source for the latest research on the impact of culture on architecture through the aspects of planning and production and highlights the importance of communicative dimension in design Featuring exhaustive coverage on a variety of relevant perspectives and topics such as the evolution of construction systems benefits of nature based architecture and fundamentals of social capital this publication is ideally designed for researchers scholars and students seeking current research on the connection between culture and architecture on a global level

Governing by Design Aggregate Architectural History Collaborative, 2012-04-29 Governing by Design offers a unique perspective on twentieth century architectural history It disputes the primacy placed on individuals in the design and planning process and instead looks to the larger influences of politics culture economics and globalization to uncover the roots of how our built environment evolves In these chapters historians offer their analysis on design as a vehicle for power and as a mediator of social currents Power is defined through a variety of forms modernization obsolescence technology capital ergonomics biopolitics and others The chapters explore the diffusion of power through the establishment of norms and networks that frame human conduct action identity and design They follow design as it functions through the body in the home and at the state and international level Overall Aggregate views the intersection of architecture with the human need for what Foucault termed governmentality societal rules structures repetition and protocols as a way to provide security and tame risk Here the conjunction of power and the power of design reinforces governmentality and infuses a sense of social permanence despite the exceedingly fluid nature of societies and the disintegration of cultural memory in the modern era

*Digital Signifiers in an Architecture of Information* Pablo Lorenzo-Eiroa, 2023-05-31 This book proposes a new critical relationship between computation and architecture developing a history and theory of representation in architecture to understand and unleash potential means to open up creativity in the field Historically architecture has led to spatial representation Today computation has established new representational paradigms that can be compared to spatial representations such as the revolution of perspective in the Renaissance Architects now use software robotics and fabrication tools with very little understanding and participation in how these tools influence revolutionize and determine both architecture and its construction today Why does the discipline of architecture not have a higher degree of authorship in the conception and development of computational technologies that define spatial representation This book critically explores the relationship between history theory and cultural criticism Lorenzo Eiroa positions new understandings through parallel historical sections and theories of many revolutionary representational architecture canons displaced by conventional spatial projection He identifies the architects artists mathematicians and philosophers that were able to revolutionize their disciplines through the development of new technologies new systems of representation and new lenses to understand reality This book frames the discussion by addressing new means to understand and expand architecture authorship in relation to the survey information representation higher dimensional space Big Data and Artificial Intelligence in the pursuit of activating an architecture of information This will be important reading for upper level students and researchers of architecture and architectural theory especially those with a keen interest in computational design and robotic fabrication
