Holmes, 1996      Climate Change and Catastrophe Management in a Changing China Qihao He, China is the largest greenhouse gas emitter in the world and also suffers from devastating climate catastrophes Increasingly policymakers in China have come to realize that government alone cannot adequately prevent or defray climate related disaster risks This book contends that a better way to manage catastrophe risk in China is through private insurance rather than directly through the Chinese government In addition private insurance could function as a substitute for or complement to government regulation of catastrophe risks by causing policyholders to take greater precautions to reduce climate change risks      Research Handbook on International Insurance Law and Regulation Julian Burling, Julian M. Burling, Kevin Lazarus, 2012 Global insurance and its rapidly evolving law and regulation demands international research To this aim the Handbook offers a truly international collection of essays Highly renowned

experts analyze the key topics currently under international discussion and development While representing a diversity of national jurisdictions the focus lies on the largest insurance jurisdictions USA UK and Germany but newly important jurisdictions like Brazil and China are considered as well a most valuable and important contribution to international insurance law literature Manfred Wandt Director of the Insurance Law Institute Goethe University Frankfurt Germany This Research Handbook is published at an opportune time A global review of insurance law and regulation is underway Much reform happens locally with little reference to developments elsewhere and this Research Handbook brings the strands together It is a comprehensive review by distinguished authors from different backgrounds including both leading academics and practitioners They consider the definitions of insurance its economic underpinnings comparative law and regulations actual and proposed reforms the effects on underwriting and claims and how insurance is studied and taught Good laws and regulation benefit the market and its customers Bad laws and regulation do the opposite This book is required reading for all involved in the reform process David Hertzell Law Commissioner Globalisation has had no greater impact in the commercial world than on insurance the law which governs it and the risks it seeks to address Those who inspired this publication and the contributing authors are to be thanked for providing such a necessary and useful reference source It covers so much of what insurance professionals need to be aware of in the insurance law world of the twenty first century Michael Gill President of the International Insurance Law Association Given its economic importance insurance is a field that has been underserved as an area of academic study This detailed book provides much needed coverage of insurance law and regulation in its international context Produced in association with Lloyd s it draws on the expertise both of academics and practising lawyers Containing 30 comprehensive chapters it provides in depth studies on key areas such as the role of international organisations the judicial interpretation of insurance contract clauses and transnational regulatory recognition It also provides thorough introductions to important jurisdictions including the EU US and Japan as well as focusing on newly emerging economies such as China and Brazil Specialist topics covered include regulation by and of Lloyd s the tort of bad faith in the US microinsurance and takaful insurance This well documented resource will appeal to academics and students in insurance law and regulation policymakers and private practice lawyers The book also aims to stretch the imagination of anyone with an interest in insurance law and regulation providing detailed analysis and avenues for further investigation

InsurTech: A Legal and Regulatory View Pierpaolo Marano, Kyriaki Noussia, 2019-12-05 This Volume of the AIDA Europe Research Series on Insurance Law and Regulation explores the key trends in InsurTech and the potential legal and regulatory issues that accompany them There is a proliferation of ideas and concepts within InsurTech that will fundamentally change the market in the next few years These innovations have the potential to change the way the insurance industry works and alter the relationships between customers and insurers resulting in insurance products that are more closely aligned to individual preferences and priced more appropriately to the risk Increasing use of technology in the

insurance sector is having both a disruptive and transformative impact on areas including product development distribution modelling underwriting and claims and administration practice The result is a new industry known as InsurTech But while the insurance market looks to technology for greater efficiency regulators are beginning to raise concerns about managing potential risks The first part of the book examines technological innovations relevant for insurance such as FinTech InsurTech Sharing Economy and the Internet of Things The second part then gathers contributions on insurance contract law in a digitalized world while the third part focuses on cyber insurance and robots Last but not least the fourth part of the book discusses legal and ethical questions regarding autonomous vehicles and transportation including the shipping industry as well as their impact on the insurance sector and civil liability Written by legal scholars and practitioners the book offers international comparative and European perspectives The Chapters FinTech InsurTech and the Regulators by Viktoria Chatzara Smart Contracts in Insurance A Law and Futurology Perspective by Angelo Borselli and Room for Compulsory Product Liability Insurance in the European Union for Smart Robots by Aysegul Bugra are available open access under a CC BY 4.0 license at [link.springer.com](http://link.springer.com) All three open access chapters were funded by BIPAR

**The Cambridge Handbook of Disaster Law and Policy** Susan S. Kuo, John Travis Marshall, Ryan Rowberry, 2022-09-29 This century's major disasters from Hurricane Katrina and the Fukushima nuclear meltdown to devastating Nepalese earthquakes and the recent crippling volcanic eruptions and tsunamis in Tonga have repeatedly taught that government

institutions are ill prepared for major disaster events leaving the most vulnerable among us unprotected These tragedies represent just the beginning of a new era of disaster an era of floods heatwaves droughts and pandemics fueled by climate change Laws and government institutions have struggled to adapt to the scope of the challenge old models of risk no longer apply This Handbook provides timely guidance taking stock of the field of disaster law and policy as it has developed since Hurricane Katrina Experts from a wide range of academic and practical backgrounds address the root causes of disaster vulnerability and offer solutions to build more resilient communities to ensure that no one is left behind

*Covid-19 and Insurance* María Luisa Muñoz Paredes, Anna Tarasiuk, 2023-01-10 This book offers a novel study on the impact of the Covid 19 pandemic on insurance from an international and comparative perspective It assesses how insurance has to adapt to a new landscape the effects of which will last over time and cut across all areas of the field To avoid physical contact digitalisation has accelerated dramatically affecting insurance in all its phases risk selection underwriting pricing and claims settlement However the effects of the Covid 19 pandemic go far beyond that The extent to which a claim caused directly or indirectly by the virus is or is not covered by a given policy has been the subject of debate in many insurance branches The most litigated cases worldwide are those that concern damages resulting from business interruption due to restrictions enforced by the authorities in virtually every country This book analyses the rulings for and against the insured that have already been handed down by courts in various jurisdictions for example in the US Latin America Spain and Germany in order to provide guidance to the parties in future lawsuits and also to guide the courts own responses This analysis extends

to the measures that governments have taken in relation to insurance during the pandemic as well as the changes that insurers have introduced in their general conditions to exclude coverage for the pandemic This response is unsatisfactory as the big question is how pandemic related risks can be covered if private insurers simply refuse to do so Solutions based on risk sharing with public entities or the use of contractual modalities such as parametric insurance are among those outlined by the authors The book was written by experts from academia and lawyers specialising in this field and written for all those interested in the field of insurance lawyers judges academics and legal professionals **Fault Lines** David M.

Engel, Michael McCann, 2009-04-24 Tort law a fundamental building block of every legal system features prominently in mass culture and political debates As this pioneering anthology reveals tort law is not simply a collection of legal rules and procedures but a set of cultural responses to the broader problems of risk injury assignment of responsibility compensation valuation and obligation Examining tort law as a cultural phenomenon and a form of cultural practice this work makes explicit comparisons of tort law across space and time looking at the United States Europe and Asia in the nineteenth twentieth and twenty first centuries It draws on theories and methods from law sociology political science and anthropology to offer a truly interdisciplinary pathbreaking view Ultimately tort law the authors show nests within a larger web of relationships and shared discursive conventions that organize social life **Understanding Insurance Law** Robert H.
