## **Saving Cinco Breed Rescue In Action:**

*Saving Cinco* Howard Schultheis, 2014-11-06 This book is a narrative that I wrote as a rescue progressed At one point I was about to hit delete and get rid of the whole thing It was about to end that badly Then I realized that it was not about the results but rather the process of rescue that I was trying to write about I decided it would end where it would end for better or worse My hope was only that it would end well

Wild Rescues Raina Mooncrest, AI, 2025-03-05 *Wild Rescues* explores the vital role animal rescue plays in global conservation efforts highlighting how individual acts of dedication can significantly impact species endangerment and habitat preservation The book emphasizes that wildlife rescue is not just a compassionate act but a critical scientific endeavor For example rescuing orphaned elephants allows them to return to their natural ecosystems contributing to biodiversity and ecosystem health The book examines the escalating rates of species extinction and habitat loss due to human activities such as deforestation and pollution and explores how advances in veterinary medicine and conservation biology have shaped rescue techniques By showcasing real world case studies from stranded whales to endangered species brought back through breeding programs *Wild Rescues* illustrates the challenges rescuers face and the innovative solutions they employ The narrative progresses from introducing core principles and ethical considerations to detailed case studies and ultimately advocates for improved conservation policies Including evidence based accounts and personal interviews this book connects biology environmental science and ethics to demonstrate the multifaceted nature of conservation challenges and solutions making it valuable for anyone interested in nature biology and conservation

**Manifestly Haraway** Donna J. Haraway, 2016-04-01 Electrifying provocative and controversial when first published thirty years ago Donna Haraway's *Cyborg Manifesto* is even more relevant today when the divisions that she so eloquently challenges of human and machine but also of gender class race ethnicity sexuality and location are increasingly complex The subsequent *Companion Species Manifesto* which further questions the human nonhuman disjunction is no less urgently needed in our time of environmental crisis and profound polarization *Manifestly Haraway* brings together these momentous manifestos to expose the continuity and ramifying force of Haraway's thought whose significance emerges with engaging immediacy in a sustained conversation between the author and her long term friend and colleague Cary Wolfe Reading cyborgs and companion species through and with each other Haraway and Wolfe join in a wide ranging exchange on the history and meaning of the manifestos in the context of biopolitics feminism Marxism human nonhuman relationships making kin literary tropes material semiotics the negative way of knowing secular Catholicism and more The conversation ends by revealing the early stages of Haraway's *Chthulucene Manifesto* in tension with the teleologies of the doleful Anthropocene and the exterminationist Capitalocene Deeply dedicated to a diverse and robust earthly flourishing *Manifestly Haraway* promises to reignite needed discussion in and out of the academy about biologies technologies histories and still possible futures

**The New York Times Index**, 1924      New Challenges and Perspectives in Conservation Breeding Programs Eliana Pintus, José Luis Ros-Santaella, William Holt, Pierre Comizzoli, 2025-05-21 Conservation Breeding Programs CBPs remain essential tools to preserve animal biodiversity and save threatened species from extinction. Despite the advances made during the last decades CBPs have been carried out only on a small number of species, mostly mammals and birds. There is therefore an urgent need to develop and complement in situ and ex situ strategies to also preserve other vertebrates like fish, amphibians and reptiles in which the biodiversity loss because of climate change or other anthropogenic activities is even more dramatic. One of the main factors that limits CBPs success is the lack of knowledge of the animal reproductive biology and behavior which is precisely known for instance in less than 4% of mammals, the majority of which are terrestrial species. Such knowledge is beneficial not only to enhance but also to control animal fertility that is especially warranted for the management of overabundant or invasive species which represent a further major threat for biodiversity. The goal of this Research Topic is to bring together studies that deal with different aspects of animal reproduction both in captive and wild populations. This includes both ex situ and in situ approaches such as the management of animal reproduction in captive populations and their reintroduction release into the wild. Other approaches such as assisted reproductive technologies and biobanking greatly contribute to the success of conservation breeding. This Research Topic also welcomes studies exploring the effects of biotic e.g. inbreeding, diseases, stress and abiotic e.g. anthropogenic activities, housing and veterinary care factors on reproductive biology of all vertebrates classes with a special interest to fish, amphibians and reptiles. As a comprehensive knowledge of animal reproduction and behavior plays a key role for the development and success of breeding programs, descriptive studies on reproductive anatomy and physiology of wild or captive species, either endangered or overabundant, are welcomed. The Research Topic also accepts manuscripts that deal with ethical aspects of animal welfare in CBPs and population management of invasive or overabundant species.      *Amphibian conservation action plan : proceedings IUCN/SSC Amphibian Conservation Summit 2005*, 2007      *Wonder Dogs* Ben Holt, 2022-04-14 Life isn't perfect but dogs certainly make it better. Meet the incredible dogs in this inspiring collection of true stories championing the often underestimated role of man's best friend. Daisy, the tiny Dachshund who put her life on the line to save her humans from a bear. Charco, the veteran sniffer dog who has saved countless human lives and yet still keeps his tail wagging. Delta, the dog who died trying to protect her young owner from a volcano after already having saved his life three times. It's a truth universally acknowledged that dogs are pretty great. But when it comes to facing peril, these loyal creatures always seem willing to step up to the mark and become true doggy heroes. Whether they're saving humans from dangerous people or situations, helping the sick, fighting crime or just following their animal instincts to do good, the true stories featured in this expanded and updated collection prove that dogs aren't just man's best friend, they're also inspirational, courageous and
