**Interventional Cardiology and Cardiac Catheterisation** John Edward Boland,David W. M. Muller,2019-04-24 Cardiology is becoming an increasingly complex field understood by only a select group of medical specialists This publication demystifies many difficult topics in interventional cardiology and cardiac catheterisation commencing with the basics of laboratory instrumentation and technology and progressing to a comprehensive review of both new and established cardiac interventions Unlike other publications that are directed mainly towards clinicians this text is specifically written to assist newcomers such as such as medical trainees nurses technicians scientific staff and other allied health professionals understand the wonders of interventional cardiology and includes extensive explanations of the techniques of angiography and new percutaneous The comprehensive information presented herein written by recognised specialists in their respective fields will no doubt prove of great benefit to clinician and non medical specialist alike

## **Cardiovascular Catheterization and Intervention** Debabrata Mukherjee, Eric Bates, Marco Roffi, David

Moliterno, 2010-08-24 The field of invasive and interventional cardiology is dynamic with frequent advances in both technique and technology. An internationally renowned team of editors and over 100 contributors have shaped this textbook to provide clinicians with a thorough guide that covers the procedural and peri-procedural aspects of coronary, peripheral, and structural heart disease diagnostics and interventions. This comprehensive and highly illustrated textbook presents critical information for anyone active in the field of cardiovascular interventions, including practical suggestions on how to set up a cardiovascular catheterization laboratory, choose the right equipment, and minimize radiation exposure. A careful analysis of the general principles of percutaneous coronary interventions, the specific knowledge needed in different clinical scenarios, as well as the patient selection criteria for each invasive procedure. In-depth coverage of non-coronary interventions, including 13 chapters on peripheral vascular interventions, including carotid artery stenting, as well as newer procedures for intracranial stenosis, treatment of septal defect repair, and left atrial appendage closure. An incorporation of emerging procedures in structural heart disease, such as percutaneous aortic valve replacement and mitral valve repair, that although not presently mainstream, will likely become an important domain of interventional cardiologists. Given the importance of appropriate training and credentialing for clinicians, the textbook also includes current national guidelines and policies on the performance of the various procedures.
