Franco American Sen ze Research Project undertook five seasons of major fieldwork with the goals of clarifying the age stratigraphy and taphonomy of Sen ze as well as finding additional remains especially of the less well known taxa In this volume following a history of study and summary of the new fieldwork four geological chapters consider field methods stratigraphy volcanology and dating Combining argon argon ages and paleomagnetic calibration the newly recovered fossils are shown to date between 2 20 and 2 08 Ma with concentrations ca 2 20 2 18 and 2 10 2 08 Ma significantly older than previously thought Chapters on palynology ichthyology and ornithology are followed by eight chapters on the fossil mammals The chapter on biochronology places Sen ze among other sites at the start of MNQ 18 which is estimated to end ca 1 7 Ma Of some 2200 specimens known from the site over half are cervids with bovids rhinocerotids and equids far behind According to data from palynology and the habitat preferences of the more common mammals the paleoenvironment around the Sen ze maar would have included forest woodland and grassland perhaps in a warmer and moister climate than today Taphonomic studies revealed that bones often rested a long time under water lacked any indication of carnivore attack and often displayed pathologies in their joints It is likely that most of the associated skeletons were preserved undisturbed after large mammals fell into the paleolake and drowned without being able to climb out This book responds to the long held desire of later Cenozoic paleontologists to see a modern study of a site recognized worldwide as a biochronologic reference for the Plio Pleistocene Our study required renewed fieldwork using up to date techniques of topography sedimentology stratigraphy geochronology and taphonomy The systematic paleontology chapters are based on re study of the entire body of Sen ze fossils collected during more than a century of research The volume will be of interest to paleontologists especially those concerned with the evolution of the European fauna and with the taxa studied as well as with paleoenvironmental reconstruction and biogeography It will also be of value to mammalogists interested in analyses of near modern taxa and to paleoanthropologists archaeologists and taphonomists interested in the methods utilized and the role of Sen ze as a comparative standard for a site of this age without human intervention It will surely be an essential reference for all those who want to know more about Life in Central France Around Two Million Years Ago

Lange Clinical Neurology and Neuroanatomy: A Localization-Based Approach Aaron L. Berkowitz, 2017-02-22 An engagingly written text that bridges the gap between neuroanatomy and clinical neurology A Doody's Core Title for 2021 A wonderfully readable concise but by no means superficial book that fits well in the current pedagogic environment From the Foreword by Allan H Ropper MD Clinical Neurology and Neuroanatomy delivers a clear logical discussion of the complex relationship between neuroanatomical structure and function and neurologic disease Written in a clear concise style this unique text offers a concise overview of fundamental neuroanatomy and the clinical localization principles necessary to diagnose and treat patients with neurologic diseases and disorders Unlike other neurology textbooks that either focus on neuroanatomy or clinical neurology Clinical Neurology and Neuroanatomy integrates the two in manner which simulates the way neurologists

learn teach and think Clinical Neurology and Neuroanatomy is divided into two main sections In Part 1 clinically relevant neuroanatomy is presented in clinical context in order to provide a framework for neurologic localization and differential diagnosis The diseases mentioned in localization based discussions of differential diagnosis in Part 1 are then discussed in clinical detail with respect to their diagnosis and management in Part 2 Part 1 can therefore be consulted for a neuroanatomical localization based approach to symptom evaluation and Part 2 for the clinical features diagnosis and management of neurologic diseases FEATURES A clear concise approach to explaining the complex relationship between neuroanatomical structure and function and neurologic disease Numerous full color illustrations and high resolution MRI and CT scans Explanatory tables outline the clinical features characteristics and differential diagnosis of neurologic diseases and disorders Proceedings of the United States National Museum United States National Museum,1909
