Along with your BRAVIA™ TV set, a complete HD system requires an HD source, access to HD content, and proper setup connections with compatible set-top boxes, DVD players, and satellite feeds.

Remember, an HD programming is required to experience the full benefit of HD.

The quality of the image you see on your BRAVIA™ can vary as high as the quality of the signal it is displaying. This chart shows the different signal types and how to access them.

### Signal

	Connection	Source
High Definition Content	Set personal quality and aspect ratio	HD Content (see page 68) All content fully supports 1080p resolution Full-screen presentation
Original Content	Fixed picture quality and aspect ratio (as original)	Full-screen presentation Original aspect ratio (letterbox)
Standard Content	Original or Standard (1080i/720p)	Full-screen presentation Letterbox presentation

Connect your cable or satellite provider to upgrade your service to HD. Remember that not all HD broadcasts will be HD-quality picture (some broadcasts will). Check the quality of broadcasts from available on your high connection (see page 68).
