Defense Transportation: Algorithms, Models and Applications for the 21st Century Robert T. Brigantic, Jean Mahan, 2004-07-22 Defense Transportation Algorithms Models and Applications for the 21st Century contains papers divided into three general sections according to the title of this text algorithms models and applications The first section on algorithms contains papers that are theoretical in nature or contain new techniques that relate to Defense Transportation System DTS processes A sampling of the papers contained in this section deals with group theoretic tabu search techniques shortest path sailing distance algorithms and strategic airlift model validation methods The second section contains papers on various transportation models used throughout the DoD and transportation industry as well as some newly developed transportation modelling methods that may eventually find their way into larger scale transportation models A review of the major strategic mobility models is also contained in this section The third section contains papers on various transportation applications that have been used to support various DTS studies and analyses This section also contains a diverse set of topics with articles ranging from a paper on North Atlantic Treaty Organization NATO strategic lift requirements to an analysis paper on theater reception staging onward movement and integration Preface by General John W Handy Commander United States Transportation Command Focus on land sea and air transportation models and methods Manuscripts written by analysts and researchers active in the field and directly supporting the United States Defense Transportation System Research methods were instrumental in defining the in place DTS that so efficiently deployed forces for Operation Enduring Freedom and Operation Iraqi Freedom Advanced Information Systems Engineering Anne Banks Pidduck, 2002-05-17 This book constitutes the refereed proceedings of the 14th International Conference on Advanced Information Systems Engineering CAiSE 2002 held in Toronto Canada in May 2002 The 42 revised full papers and 26 short papers presented together with four invited contributions were carefully reviewed and selected from a total of 173 submissions The book offers topical sections on Web application development knowledge management deployment issues semantics of information system qualities integration issues analysis and adaption retrieval and performance requirement issues schema matching and evolution workflows semantics and logical representations understanding and using methods and modeling objects and relationships Seminal Contributions to Information Systems Engineering Janis Bubenko, John Krogstie, Oscar Pastor, Barbara Pernici, Colette Rolland, Arne Sølvberg, 2013-06-13 In 2013 the International Conference on Advance Information Systems Engineering CAiSE turns 25 Initially launched in 1989 for all these years the conference has provided a broad forum for researchers working in the area of Information Systems Engineering To reflect on the work done so far and to examine prospects for future work the CAiSE Steering Committee decided to present a selection of seminal papers published for the conference during these years and to ask their authors all prominent researchers in the field to comment on their work and how it has developed over the years The scope of the papers selected covers a broad range of

topics related to modeling and designing information systems collecting and managing requirements and with special attention to how information systems are engineered towards their final development and deployment as software components With this approach the book provides not only a historical analysis on how information systems engineering evolved over the years but also a fascinating social network analysis of the research community Additionally many inspiring ideas for future research and new perspectives in this area are sparked by the intriguing comments of the renowned authors

Handbook of Research on Artificial Intelligence Techniques and Algorithms Vasant, Pandian, 2014-11-30 For decades optimization methods such as Fuzzy Logic Artificial Neural Networks Firefly Simulated annealing and Tabu search have been capable of handling and tackling a wide range of real world application problems in society and nature Analysts have turned to these problem solving techniques in the event during natural disasters and chaotic systems research The Handbook of Research on Artificial Intelligence Techniques and Algorithms highlights the cutting edge developments in this promising research area This premier reference work applies Meta heuristics Optimization MO Techniques to real world problems in a variety of fields including business logistics computer science engineering and government This work is particularly relevant to researchers scientists decision makers managers and practitioners

Integration of AI and OR Techniques in Constraint Programming for Combinatorial Optimization Problems Willem-Jan van Hoeve, John N. Hooker, 2009-05-17 This book constitutes the refereed proceedings of the 6th International Conference on Integration of AI and OR Techniques in Constraint Programming for Combinatorial Optimization Problems CPAIOR 2009 held in Pittsburgh PA USA in May 2009 The 20 revised full papers and 10 extended abstracts presented together with 2 invited talks were carefully reviewed and selected from 65 submissions The papers describe current research in the fields of constraint programming artificial intelligence and operations research and present new techniques or new applications in combinatorial optimization thus exploring ways of solving large scale practical optimization problems through integration and hybridization of the fields different techniques

Competitive Programming in Python Christoph Dürr, Jill-Jênn Vie, 2020-12-17 Want to kill it at your job interview in the tech industry Want to win that coding competition Learn all the algorithmic techniques and programming skills you need from two experienced coaches problem setters and jurors for coding competitions The authors highlight the

versatility of each algorithm by considering a variety of problems and show how to implement algorithms in simple and efficient code Readers can expect to master 128 algorithms in Python and discover the right way to tackle a problem and quickly implement a solution of low complexity Classic problems like Dijkstra's shortest path algorithm and Knuth Morris Pratt's string matching algorithm are featured alongside lesser known data structures like Fenwick trees and Knuth's dancing links The book provides a framework to tackle algorithmic problem solving including Definition Complexity Applications Algorithm Key Information Implementation Variants In Practice and Problems Python code included in the book and on the companion website **Integration of AI and OR Techniques in Constraint Programming** Helmut

Simonis,2014-05-12 This book constitutes the proceedings of the International Conference on the Integration of Artificial Intelligence AI and Operations Research OR Techniques in Constraint Programming CPAIOR 2014 held in Cork Ireland in May 2014 The 33 papers presented in this volume were carefully reviewed and selected from 70 submissions The papers focus on constraint programming and global constraints scheduling modelling encodings and SAT logistics MIP CSP and complexity parallelism and search and data mining and machine learning Effective Surveillance for Homeland Security Francesco Flammini,Roberto Setola,Giorgio Franceschetti,2013-06-13 Effective Surveillance for Homeland Security Balancing Technology and Social Issues provides a comprehensive survey of state of the art methods and tools for the surveillance and protection of citizens and critical infrastructures against natural and deliberate threats Focusing on current technological challenges involving multi disciplinary problem analysis and systems engineering approaches it provides an overview of the most relevant aspects of surveillance systems in the framework of homeland security Addressing both advanced surveillance technologies and the related socio ethical issues the book consists of 21 chapters written by international experts from the various sectors of homeland security Part I Surveillance and Society focuses on the societal dimension of surveillance stressing the importance of societal acceptability as a precondition to any surveillance system Part II Physical and Cyber Surveillance presents advanced technologies for surveillance It considers developing technologies that are part of a framework whose aim is to move from a simple collection and storage of information toward proactive systems that are able to fuse several information sources to detect relevant events in their early incipient phase Part III Technologies for Homeland Security considers relevant applications of surveillance systems in the framework of homeland security It presents real world case studies of how innovative technologies can be used to effectively improve the security of sensitive areas without violating the rights of the people involved Examining cutting edge research topics the book provides you with a comprehensive understanding of the technological legislative organizational and management issues related to surveillance With a specific focus on privacy it presents innovative solutions to many of the issues that remain in the quest to balance security with the preservation of privacy that society demands **Smart and Digital Cities** Vitor Nazário Coelho,Igor Machado Coelho,Thays A.Oliveira,Luiz Satoru Ochi,2019-05-16 This book presents up to date information on the future

digital and smart cities In particular it describes novel insights about the use of computational intelligence techniques and decentralized technologies covering urban aspects and services cities governance and social sciences The topics covered here range from state of the art computational techniques to current discussions regarding drones blockchain smart contracts and cryptocurrencies The idealization of this material emerged with a journey of free knowledge exchange from a diverse group of authors who met each other through four different events workshops and special sessions organized with the purpose of boosting the concepts surrounding smart cities We believe that this book comprises innovative and precise information regarding state of the art applications and ideas for the future of cities and society It will surely be useful not only for the academic community but also to the industry professionals and city managers [Networking-ICN...](#) ,2001
