Industrialisation in Britain 1940 - 1970 Christine Wall,2013-07-04 This book is unique in describing the history of post war reconstruction from an entirely new perspective by focusing on the changing relationship between architects and building workers It considers individual as well as collective interactions with technical change and in doing so brings together for the first time an extraordinary range of sources including technical archives oral history and visual material to describe the construction process both during and in the decades after the war It focuses on the social aspects of production and the changes in working life for architects and building workers with increasing industrialization in particular analysing the effect on the building process of introducing dimensionally co ordinated components Both architects and building workers have been accused of creating a built environment now popularly discredited architects responsible for poor design and building workers for poor workmanship However many of the structures and ideas underpinning this period of rapid change were revolutionary in their commitment to a complete transformation of the building process An Architecture of Parts adds to the growing literature on changes in the building world during and immediately after the Second World War It is significant both empirically and historically in its examination of the ideas technology and relationships that fired industrialization of the building process in mid century Britain

Architecture Martin van der Linden,2021-03-12 The question of what architecture is answered in this book with one sentence Architecture is space created for human activities The basic need to find food and water places these activities within a larger spatial field Humans have learned and found ways to adjust to the various contextual difficulties that they faced as they roamed the earth Thus rather than adapting humans have always tried to change the context to their activities Humanity has looked at the context not merely as a limitation but rather as a spatial situation filled with opportunities that allows through intellectual interaction to change these limitations Thus humanity has created within the world their own contextual bubble that firmly stands against the larger context it is set in The key notion of the book is that architecture is space carved out of and against the context and that this process is deterministic

Architectural Record ,1982 **CONVIVIA FILTH** Vera Bühlmann ,Riccardo M. Villa,Cris Argüelles ,2024-09-05 Convivia is a journal that is interested in thinking what architectonics is or could be in the twenty first century Pre specific to architecture architectonics deals with the real in an abstract yet edifying manner Under architectonics the indeterminacy brought by contemporary science is assumed as a liberation from ontological and epistemological principles and welcomed as

a fortunate occasion to understand and embrace the stating of any principle as an art in itself autonomous yet not automatic or autarkic Architectonic deals with the real in terms of a communicational physics through articulations that are concrete yet reasoned in abstractive and projective manners The journal aims to set the table for a series of banquets of convivia in which courses do not respond to mere needs or inconsequential delights of consumption We focus on architectonic alloys of necessities and contingencies necessities are bounded by contingencies and contingencies are engendered through figuring out what is necessary Convivia's interest is to make cases

The Funambulist Papers Funambulist Papers, 2015-04-09 This book is the second volume of texts curated specifically for The Funambulist since 2011 The editorial line of this second series of twenty six essays is dedicated to philosophical and political questions about bodies This choice is informed by L opold Lambert's own interest in the often violent relation between the designed environment and bodies Corporeal politics do not exist in a void of objects buildings and cities on the contrary they operate through the continuous material encounters between living and non living bodies Several texts proposed in this volume examine various forms of corporeal violence racism gender based violence etc This examination however can only exist in the integration of the designed environment's conditioning of this violence As Mimi Thi Nguyen argues in the conclusion of this book's first chapter the process of attending to the body unhooded unveiled unclothed cannot be the solution to racism because that body is always already an abstraction an effect of law and its violence Although the readers won't find indications about the disciplinary background of the contributors the witty self descriptions at the end of the book being preferred to academic resumés the content of the texts will certainly attest to the broad imaginaries at work throughout this volume Dialogues between dancers and geographers between artists and biohackers between architects and philosophers and so forth provide the richness of this volume through difference rather than similarity The Funambulist Papers are published by the CTM Documents Initiative imprint Center for Transformative Media Parsons School of Design The New School CTM is a transdisciplinary media research initiative bridging design and the

social sciences and dedicated to the exploration of the transformative potential of emerging technologies upon the foundational practices of everyday life across a range of settings Facilities Management Keith Alexander, Brian Atkin, Jan Bröchner, Tore Haugen, 2004-08-02 Facilities Management sets out a new framework for the discipline of facilities management which challenges many of the norms and which sets out new methods for optimising the performance of a business Successful facilities managers need a range of skills and need to be able to devise a range of innovative strategies for the future of the organisations in which they work This new book follows on directly from Keith Alexander s ground breaking textbook Facilities Management and focuses on four new themes which have been identified as keys to the new strategy organisational change and learning innovation performance and the knowledge workplace
