Nothing Permanent Todd Cronan, 2023-06-20 A critical look at the competing motivations behind one of modern architecture's most widely known and misunderstood movements Although mid century modern has evolved into a highly popular and ubiquitous architectural style this term obscures the varied perspectives and approaches of its original practitioners In Nothing Permanent Todd Cronan displaces generalizations with a nuanced intellectual history of architectural innovation in California between 1920 and 1970 uncovering the conflicting intentions that would go on to reshape the future of American domestic life Focusing on four primary figures R M Schindler Richard Neutra and Charles and Ray Eames Nothing Permanent demonstrates how this prolific era of modern architecture in California rather than constituting a homogenous movement was propelled by disparate approaches and aims Exemplified by the twin pillars of Schindler and Neutra and their respective ideological factions these two groups of architects represent opposing poles of architectural intentionality embodying divergent views about the dynamic between interior and exterior the idea of permanence and the extent to which architects could exercise control over the inhabitants of their structures Looking past California modernism's surface level idealization in present day style guides home decor publications films and television shows Nothing Permanent details the intellectual aesthetic and practical debates that lie at the roots of this complex architectural moment Extracting this period from its diffusion into visual culture Cronan argues that mid century architecture in California raised questions about the meaning of architecture and design that remain urgent today

The Architecture of Suspense Christine Madrid French,2022-09-08 The inimitable haunting films of Alfred Hitchcock took place in settings both exterior and interior that deeply impacted our experiences of his most unforgettable works From the enclosed spaces of Rope and Rear Window to the wide open expanses of North by Northwest the physical worlds inhabited by desperate characters are a crucial element in our perception of the Hitchcockian universe As Christine Madrid French reveals in this original and indispensable book Hitchcock's relation to the built world was informed by an intense engagement with location and architectural form in an era marked by modernism's advance fueled by some of the most creative midcentury designers in film Hitchcock saw elements of the built world not just as scenic devices but as interactive areas to frame narrative exchanges In his films building forms also serve a sentient purpose to capture and convey feelings sensations and moments that generate an emotive response from the viewer Visualizing the contemporary built landscape allowed the director to illuminate Americans everyday experiences as well as their own uncertain relationship with their environment and with each other French shares several untold stories such as the real life suicide outside the Hotel Empire in Vertigo which foreshadowed uncannily that film's tragic finale and takes us to the actual buildings that served as the inspiration for Psycho's infamous Bates Motel Her analysis of North by Northwest uncovers the Frank Lloyd Wright underpinnings for Robert Boyle's design of the modernist house from the film's celebrated Mount Rushmore sequence and ingeniously establishes the Vandamm House as the prototype of the cinematic trope of the villain's lair She also shows how the widespread unemployment of the 1930s resulted in a surge of gifted architects transplanting their careers into the film industry These practitioners created sets that drew from contemporary design schools of thought and referenced real structures both modern and historic The Architecture of Suspense is the first book to document how these great architectural minds found expression in Hitchcock's films and how the director used their talents and his own unique vision to create an enduring and evocative cinematic world Publication of this volume was assisted by a grant from Furthermore a program of the J M Kaplan Fund

to the Industrial Revolution and the Post Industrial Revolution to the Present *The Art of the Portrait* Norbert Schneider, 2002 **Modern American Poetry and the Architectural Imagination** Jo Gill, 2023 Modern American Poetry and the Architectural Imagination The Harmony of Forms assesses the relationship between architectural and poetic innovation in the United States across the twentieth century Taking the work of five key poets as case studies and drawing on the work of a rich range of other writers architects artists and commentators this study proposes that by examining the sustained and productive if hitherto overlooked engagement between the two disciplines we enrich our understanding of the complexity and interrelationship of both The book begins by tracing the rise of what was conceived of as modern and often international style architecture and by showing how poetry and architecture in the early decades of the century developed in dialogue and within a shared and often transnational context It then moves on to examine the material aesthetic and social conditions that helped shape both disciplines offering new readings of familiar poems and bringing other pertinent resources to light It considers the uses to which poets of the period put the insights of architecture and vice versa In closing Gill turns to modern and contemporary architects written accounts of their own practice in memoirs and other commentaries and examines how they have assimilated or resisted the practice and vision of poetry Survival Boogie Woogie. Neo-Japonisme. Architectural Photography & Abstraction Jean-Sébastien Cluzel, 2024-07-01 What links are there between Piet Mondrian's unfinished work Victory Boogie Woogie 1942-4 and post war Japanese and Japanese style architectural photography As far back as the mid 1950s critics and photographers were inclined to link Mondrian's painting with modern Japanese architecture and some historians were to go so far as to assert that Mondrian himself had been influenced by traditional Japanese architecture Powerful associations such as these contributed to the coming together of Western and Japanese architectural modernity They also underpinned the survival of Japonisme in architecture or put another way of the neo Japonisme that emerged after the Second World War However while this kinship between Mondrian's abstraction and the aesthetic of Japanese architecture is little apparent in architecture it does show in architectural photography This book which takes a sidelong look at Mondrian examines the works of the foremost among Japanese and American architectural photographers in an effort to interpret the dynamics of how the world of architecture was Japanized between 1945 and 1985
