Revuelta, 2021-03-02 Construction Materials is a comprehensive textbook covering all raw materials and products related to
the construction processes and not only those applied to building structures The book is organized to help readers achieve
competent knowledge about construction materials At the beginning of the book the author offers the general concepts
definitions and standards adopted worldwide for these materials to be used along the book The central part of the text covers
the primary construction materials required to manufacture concrete and mortars the most relevant construction materials in
the last century Expressly concrete and mortar are treated in detail in dedicated chapters per component In addition the
author addresses other relevant materials in construction such as ceramic materials metals and alloys bituminous materials
and geosynthetic materials Finally since the construction industry is one of the largest single waste producing sector in the
world the last chapter outlines the main types and characteristics of construction and demolition waste e g recycled
aggregates The book appeals to students but also professionals interested in construction materials and construction and
