Rewriting the Rules of the American Economy: An Agenda for Growth and Shared Prosperity Joseph E. Stiglitz, 2015-11-02 It's time to rewrite the rules to curb the runaway flow of wealth to the top one percent to restore security and opportunity for the middle class and to foster stronger growth rooted in broadly shared prosperity Inequality is a choice The United States bills itself as the land of opportunity a place where anyone can achieve success and a better life through hard work and determination But the facts tell a different story the U S today lags behind most other developed nations in measures of inequality and economic mobility For decades wages have stagnated for the majority of workers while economic gains have disproportionately gone to the top one percent Education housing and health care essential ingredients for individual success are growing ever more expensive Deeply rooted structural discrimination continues to hold down women and people of color and more than one fifth of all American children now live in poverty These trends are on track to become even worse in the future Some economists claim that today's bleak conditions are inevitable consequences of market outcomes globalization and technological progress If we want greater equality they argue we have

to sacrifice growth This is simply not true American inequality is the result of misguided structural rules that actually constrict economic growth We have stripped away worker protections and family support systems created a tax system that rewards short term gains over long term investment offered a de facto public safety net too big to fail financial institutions and chosen monetary and fiscal policies that promote wealth over full employment

Bill,2016-11-07 The conflict between conservatives and liberals over public economic policy appears to have become a permanent feature of the American political landscape Conservatives seek economic solutions with the market as virtually the sole organizing economic principle invoking individualism inspired by the Declaration of Independences right to the pursuit of happiness Liberals look to an important economic role for a federal government established by the Constitution to promote the general welfare In addition to the disagreement among the political class there is also no agreement among economists with no model reliably predicting the economic crises of recent decades Under these circumstances the author

believes individualism and the concern for the common good may only be reconciled through policies which promote equality of opportunity or as Abraham Lincoln expressed it equal privileges in the race of life with all its desirable human aspirations The reconciliation of individualism and the common good is developed through reviews of the meaning of liberty happiness and their economic implications The historical performance of the American economy is described in the context of the evolution of American federal government from one of limited economic scope supporting laissez faire capitalism to the current mixed government The more expansive role of government is described in terms of taxation policy and spending including concerns over the national debt and its significance With this background the general reader is invited to follow the authors path to a policy of equality of opportunity with specific proposals for an end to poverty assistance to children assistance to postsecondary education and training and commitments to social and medical security A specific taxation policy is proposed to fund these programs while maintaining a prudent and manageable national debt Associated with these proposals are reforms to make the federal government more representative of the people
