Teaching Materials and the Roles of EFL/ESL Teachers Ian McGrath, 2013-03-14 Teaching Materials and the Roles of EFL/ESL Teachers is published amidst a decade long increase in academic publications and training courses concerned with the evaluation and design of English language teaching materials. It is timely to consider what effect the advice on offer has had on teachers' practice. Are teachers evaluating materials carefully using textbooks in the ways expected by textbook writers, developing their own materials and mediating between materials and learners in the ways advised in the professional literature? The book explores these issues from a variety of perspectives. The views of publishers, textbook writers, those contributing to the professional literature and teacher educators are synthesised to establish a theory of how teachers can best fulfil their roles vis-à-vis materials and learners. This is then compared with practice as represented by published accounts of teachers' actual practices and learners' perspectives. The conclusion reached is that teacher education in materials evaluation and design is essential and suggestions are offered as to the form this might take. The book is intended particularly for MA students and teacher educators concerned with materials evaluation and design but is of interest to all those concerned with the publication and use of English language teaching materials. New Approaches to Materials Development for Language Learning Olwyn Alexander, 2007 Containing a selection of papers from a conference held in Edinburgh in 2005, this book highlights current issues in the teaching of English for academic and specific purposes.

Academic and Research Literacy Practices of Final Year Teacher Trainees in Luanda, Angola Celeste Sambeny, 2016-06-22 Academic and Research Literacy Practices of Final Year Teacher Trainees in Luanda, Angola presents a detailed study of students and lecturers at higher teacher training institutions where English is taught as a medium of instruction and specialisation. As such, the book will help raise the awareness of educators, teachers and supervisors of the need to be more supportive to students and will highlight the importance of increased responsibility on the part of the students regarding their studies, especially during the process of writing their research reports. Practical experience has shown that in most classrooms students are typically asked to produce texts for one single audience, namely the teacher or the lecturer who already knows what constitutes an acceptable response. However, in many classrooms teachers and lecturers tend to believe that literacy can be defined as the ability to encode and decode texts, the ability to decipher the main idea of a reading passage or to write a text that obeys the general conventions of language usage such as syntax, organisation and idea development. The central argument of this book, however, is that at higher levels of the educational system in Angola, academic and research literacy practices are at best questionable and at worst harmful. An extensive re-evaluation of assumptions regarding student capability and what it means to be a literate in the twenty-first century information society is of critical importance. Such a re-examination allows for extensive reflection on current practices and a powerful critique of traditional academic and research literacy methods and suggests ways in which practices of quality teaching and learning may be
