

Op. 29 134**HI/LO SPEED CONTROL/CONTROL POD**

The speed control switch, 1, is located on the right-hand control pod. It has two positions. The "Turtle" (Lo) position operates the HST unit at below normal speed. The "Rabbit" (Hi) position operates the HST unit at above normal speed. The Hi/Lo speed control can be operated with both ranges of the transmission.

10

HL/LO SPEED CONTROL

Optional Hi/low speed control is located on the front remote control valve joystick handle. Press the "Rabbit", 1, for high range or the "Turtle", 2, for low range.

NOTE: When the tractor is shut off, Hi/Lo defaults to Low.

11

Op. 29 200**FOOT CONTROL PEDALS**

The hydrostatic unit is operated by two-foot control pedals; pedal, 1, for forward operation and pedal, 2, for reverse operation. The foot pedals automatically return to neutral (stopped) position when released. The speed is controlled by varying the amount of movement of the pedal from neutral position. When a constant forward speed is desired on level terrain, setting the speed control (cruise) switch, 3 (Figure 10), to the "SET" position will hold the foot pedal in the fixed position and permit the operator to remove his foot from the pedal. When the speed (cruise) control switch is "RELEASED" the foot pedal automatically returns to the neutral position and the tractor stops.

12

NOTE: The operator can depress the pedal further from the set position to travel at a faster speed momentarily. The pedal (cruise) control can also be set in reverse.
