The influence of environmental factors such as irradiance, temperature, water, and salinity on plant physiology and on vegetative and reproductive growth is comprehensively discussed for each crop. In addition to being a thorough and up-to-date set of textbooks, the organization of the two volumes makes them an excellent reference tool. Each chapter focuses on a single crop or a group of genetically or horticulturally related crops and is appropriately divided into subsections that address individual environmental factors. Some chapters emphasize whole plant physiology and plant growth and development, while other chapters feature theoretical aspects of plant physiology. Several chapters provide botanical background discussions to enhance understanding of the crop's response to its environment. **Official Gazette of the United States Patent and Trademark Office**, 2004
