Cataclysms Laurent Testot, 2020-11-09 Humanity is by many measures the biggest success story in the animal kingdom but what are the costs of this triumph Over its three million years of existence the human species has continuously modified nature and drained its resources In *Cataclysms* Laurent Testot provides the full tally offering a comprehensive environmental history of humanity's unmatched and perhaps irreversible influence on the world Testot explores the interconnected histories of human evolution and planetary deterioration arguing that our development from naked apes to Homo sapiens has entailed wide scale environmental harm Testot makes the case that humans have usually been catastrophic for the planet hyperpredators responsible for mass extinctions deforestation global warming ocean acidification and unchecked pollution as well as the slaughter of our own species Organized chronologically around seven technological revolutions *Cataclysms* unspools the intertwined saga of humanity and our environment from our shy beginnings in Africa to today's domination of the planet revealing how we have blown past any limits along the way whether by exploding our own population numbers domesticating countless other species or harnessing energy from fossils Testot's book while sweeping is light and approachable telling the stories sometimes rambunctious sometimes appalling of how a glorified monkey transformed its own environment beyond all recognition In order to begin reversing our environmental disaster we must have a better understanding of our own past and the incalculable environmental costs incurred at every stage of human innovation *Cataclysms* offers that understanding and the hope that we can now begin to reform our relationship to the Earth

Histoire des mathématiques Jean Baudet, 2014-06-27 Il n'y a pas de meilleure introduction aux mathématiques que l'étude de son histoire Résumant vingt-six siècles de découvertes sur les figures et sur les nombres cette histoire des mathématiques ne demande aucune connaissance préalable Le lecteur y retrouvera l'intérêt qui ont porté aux mathématiques des savants comme Euclide Descartes ou Pascal Il y verra aussi comment elles ont permis Einstein de bouleverser notre vision du monde ou encore comment elles ont rendu possible les plus récents développements de l'informatique et des télécommunications Sommaire 1 Les origines de la pensée mathématique 2 Les Grecs 3 Les Romains 4 Le Moyen âge 5 La Renaissance algèbre 6 Le XVIIe siècle l'analyse 7 Le XVIIIe siècle les fonctions 8 Le XIXe siècle l'abstraction 9 Le XXe siècle la synthèse Bibliographie
