Hybrid Project Management Mark Tolbert,Susan Parente,2020-10-08 Compared to a few decades ago companies today are faced with a much more challenging environment providing successful products and solutions for their customers They are dealing with global competition very rapid change in technologies and tremendous volatility in economic conditions As project managers we are helping our companies survive in this difficult landscape We are agents of change and drivers of change The most important project management methodology today that will help us deal with this change and this volatility is Agile However no one process or project management methodology fits all situations Agile is not a panacea for all projects Many times our projects are large enough and complex enough that some parts of the project are best suited to using a predictive planning approach and other parts are more suited to using Agile Therefore a hybrid approach that mixes the traditional waterfall approach with Agile is really required in many situations today The agile community oftentimes has quite a negative view of hybrid approaches Key writers on Agile often say that attempting to use hybrid will corrupt all attempts to use Agile and will result in failure In this book the argument is made that integrating these methodologies can be done if approached the right way and in fact this is necessary today
