

The background of the book cover is a collage of mechanical and industrial images. At the top, there's a close-up of a red mechanical component, possibly a valve or a part of a pump. Below that, a large, dark, circular mechanical part, likely a flywheel or a gear, dominates the middle section. The bottom part of the cover shows a complex assembly of metal parts, including what looks like a large gear or a part of a machine's base. The overall color scheme is dominated by reds, oranges, and dark greys, giving it a technical and industrial feel.

### **Sojourning in Disciplinary Cultures** Maureen

Mathison, 2019-04-15 Sojourning in Disciplinary Cultures describes a multiyear project to develop a writing curriculum within the College of Engineering that satisfied the cultural needs of both compositionists and engineers at a large R1 university. Employing intercultural communication theory and an approach to interdisciplinary collaboration that involved all parties, cross disciplinary colleagues were able to develop useful descriptions of the process of integrating writing with engineering, overcoming conflicts and misunderstandings about the nature of writing, gender bias, hard science versus soft science, tensions and many other challenges. This volume represents the collective experiences and insights of writing consultants involved in the large scale curriculum reform of the entire College of Engineering; they collaborated closely with faculty members of the various departments and taught writing to engineering students in engineering classrooms. Collaborators developed syllabi that incorporated writing into their courses in meaningful ways, designed lessons to teach various aspects of writing, created assignments that integrated engineering and writing theory and concepts, and worked one on one with students to provide revision feedback. Though interactions were sometimes tense, the two groups, writing and engineering, developed a third culture that generally placed students at the center of learning. Sojourning in Disciplinary Cultures provides a guide to successful collaborations with STEM faculty that will be of interest to WPAs, instructors, and a range of both composition scholars and practitioners seeking to understand more about the role of writing and communication in STEM disciplines. Contributors: Linn K. Bekins, Sarah A. Bell, Mara K. Berkland, Doug Downs, April A. Kedrowicz, Sarah Read, Julie L. Taylor, Sundry Watanabe. The Engineering Student Survival Guide Krista Donaldson, 2002. What this book is about is how to learn as much as you can, get good grades, and still have fun while pursuing an engineering degree. You will find strategies to ace tests, learn to love your computer in times of cybercrisis, land most agreeable internships, and pull through the end of the quarter slams in ways that are specific to engineers.

*Wie schreiben Ingenieure im Beruf?*

Simone Karras, 2017 Schreiben ist für Ingenieure inzwischen zu einer beruflichen Schlüsselqualifikation geworden.

Dementsprechend verändert hat sich auch das Anforderungsprofil für Ingenieurberufe. Doch welche Kompetenzen verlangt dieses neue Berufsbild genau? Detailliertere Kenntnisse über die Spezifika beruflichen Schreibens von Ingenieuren sind notwendig, um ein arbeitsplatzbezogenes Kommunikationsprofil erstellen zu können. Folgenden Fragestellungen widmet sich die Autorin: Wie schreiben Ingenieure im Beruf? Wie und zu welchem Zweck werden die technischen Texte geschrieben und in welchem beruflichen Kontext werden sie gebraucht? Ergebnisse aus der Schreibforschung bilden die theoretische Grundlage für eine qualitative Untersuchung. Erste Daten konnten durch teilnehmende Beobachtung von drei Berufspraktikern ermittelt werden. Auf Grundlage der Erkenntnisse aus dieser explorativen Phase wurden teilstandardisierte Leitfaden gestaltet.

Interviews mit fünfzehn Ingenieuren geführt und diese inhaltsanalytisch ausgewertet. Daraus entstanden erste schreibdidaktische Überlegungen und es wurde versucht ein didaktisches Konzept berufsbezogenen Schreibens zu entwerfen. Es zeigte sich, dass berufliches Schreiben von Ingenieuren für ihre Berufsausübung erst relevant ist und von verschiedensten Faktoren beeinflusst wird. Texte sind vorwiegend funktionsgebunden und müssen bestimmte Anforderungen erfüllen: sie sollten adressatengerecht formuliert und nachvollziehbar sowie sachlogisch strukturiert und inhaltlich auf das Wesentliche reduziert sein. Berufliche Schreibprozesse müssen zeit- und kosteneffizient ablaufen. Weiterhin zeigte Simone Karras auf, dass Ingenieure in einem speziellen Sprachstil schreiben, mit dem sie ihre Zugehörigkeit zur eigenen Berufsgruppe demonstrieren. Art und Umfang beruflichen Schreibens ist zudem abhängig von der Position und Funktion der Ingenieure. Das Unternehmen beeinflusst auf mannigfaltige Weise berufliche Schreibprozesse von Ingenieuren.

**Texten für die Technik** Andreas Baumert, Annette Verhein-Jarren, 2011-09-29. Kein Unternehmen kommt heute ohne eine klare Beschreibung seiner Produkte aus. Der Band bietet Hilfestellung bei der Formulierung gut verständlicher Texte beispielsweise für technische Dokumentationen, Leitfäden oder Gestaltungsrichtlinien. Es richtet sich damit an Technikredakteure in der Ausbildung, angehende Ingenieure und auch an Praktiker. Begleitend zum Buch sind Zusatzmaterialien im Internet abrufbar.

Laplante, 2018-07-27. *Technical Writing: A Practical Guide for Engineers, Scientists, and Nontechnical Professionals*, Second Edition. enables readers to write, edit, and publish materials of a technical nature including books, articles, reports, and electronic media. Written by a renowned engineer and widely published technical author, this guide complements traditional writer's reference manuals on technical writing through presentation of first-hand examples that help readers understand practical considerations in writing and producing technical content. These examples illustrate how a publication originates as well as various challenges and solutions. The second edition contains new material in every chapter, including new topics, additional examples, insights, tips, and tricks, new vignettes, and more exercises. Appendices have been added for writing checklists and writing samples. The references and glossary have been updated and expanded. In addition, a focus on writing for the nontechnical persons working in the technology world and the nonnative English speaker has been incorporated. Written in an informal conversational style, unlike traditional college writing texts, the book also contains many interesting vignettes and personal stories to add interest to otherwise stodgy lessons.
