technologies Citizen involvement in the campaign historically has been and as this book shows continues to be a means to an end winning the election for the candidate For all the proliferation of apps to download polls to click videos to watch and messages to forward the decidedly undemocratic view of controlled interactivity is how most campaigns continue to operate In the fully revised second edition Presidential Campaigning in the Internet Age examines election cycles from 1996 when the World Wide Web was first used for presidential campaigning through 2016 when campaigns had the full power of advertising on social media sites As the book charts changes in internet communication technologies it shows how even as campaigns have moved from a mass mediated to a networked paradigm the possibilities these shifts in interactivity seem to promise for citizen input and empowerment remain farther than a click away Mental Health in the Digital Age Dr Elias

How did openness become a foundational value for the networks of the twenty first century *Open Standards and the Digital Age* answers this question through an interdisciplinary history of information networks that pays close attention to the politics of standardization For much of the twentieth century information networks such as the monopoly Bell System and the American military s Arpanet were closed systems subject to centralized control In the 1970s and 1980s however engineers in the United States and Europe experimented with design strategies to create new digital networks In the process they embraced discourses of openness to describe their ideological commitments to entrepreneurship technological innovation and participatory democracy The rhetoric of openness has flourished for example in movements for open government open source software and open access publishing but such rhetoric also obscures the ways the Internet and other open systems still depend heavily on hierarchical forms of control **Mindful Media: Mental Health Challenges in the Digital Age**

Church, as we know it, is inaccessible to most people. A fundamental premise of the movement is that Church can become accessible again by emerging in every nook and cranny where life already happens. *Fresh Expressions* is based in simplification, returning to basic scriptural principles and a recovery of a priesthood of all believers in the three places where people live and relate to others: First Place, The home or primary place of residence; Second Place, The workplace or school place; Third Place, The public places separate from the two usual social environments of home and workplace, which host regular, voluntary, informal and neutral spaces of communion and play. Examples are environments such as cafes, pubs, theaters, parks, and so on. During a pandemic, our two primary mission spaces were closed off; the second and third places were shut down. We couldn't have Tattoo Parlor Church; the tattoo parlor was closed. We couldn't gather in Moe's Southwest Grill for burritos and Bibles; they were doing take out only. The dog park was empty; no Paws of Praise. This limited us to the only spaces we have left: the first place or the home place, the digital place or the space of flows. This forces us into recognizing the digital space as its own kind of third place, a new missional frontier. *How's Life in the Digital Age?
