human experience But what genuine human needs will this serve Does the planet really need to be made smart Will our health and that of other living creatures really be unaffected by exposure to escalating levels of electromagnetic radiation As we enter a new era of extreme technology driven by a momentum that seems beyond the constraint of any spiritual or moral consideration both human beings and nature face an unprecedented challenge Jeremy Naydler argues that it is a challenge that can only be met through a re affirmation of essential human values and the recovery of a sacred view of nature From this grounding we can work towards a truly human future that rather than creating yet more pollution and toxicity will bring blessing to the natural world to which we belong
