New Enterprises (Routledge Revivals) Sue Birley, 2013-09-13 A constant growth of new small firms is an important part of a healthy economy yet little is known about the factors which determine success or failure in a small business Success is concerned not only with the development of a product and its market but more importantly with the individual behind it There are very few completely new ideas or products to guarantee success therefore the person seeking to start their own business must assemble customers and resources themselves before they start trading The cases outlined here are all based on actual experience and explore the issues and problems facing would be entrepreneurs They offer step by step advice on the processes involved in starting a small business and demonstrate the wide range of business opportunities available First published in 1982 this is a detailed and practical guide particularly applicable to those who find the idea of establishing a small business of their own appealing **Routledge Revivals: The World Electronics Industry (1990)** Daniel

Todd, 2018-02-05 First published in 1990 this book provides an overview of the global distribution of the electronics industry and the structural factors which promoted this distribution by the end of the 1980s Regarded as a flagship sector in both advanced and developing countries the electronics industry is encouraged by governments everywhere Covering both the civilian and the military sides of the industry Professor Todd reflects on the future of civilian electronics in the light of its global segmentation and hints at the fundamental role of governments in the unfolding of both civilian and defence electronics developments He also endorses the overwhelming significance of strategies being played by electronics enterprises in both the USA and Japan Venture Capital (Routledge Revivals) Milford B Green, 2012-11-12 First published

in 1990 this is the first text to offer a geographic and regional study of venture capitalism Although the importance of this type of capitalism in creating and nurturing small firms has long been recognized it does not have a uniform global character Drawing on previously unused data Green's book offers a geographic comparison which displays the diverse forms of venture capitalist markets from the well established to the newly emerging and the rapidly disappearing **Routledge Revivals:**

**Industrial Dislocation (1991)** Daniel Todd, 2018-05-08 First published in 1991 this book offers a thorough examination of the decline of heavy industry in industrialised countries in the West which focuses on problems in the shipbuilding industry Todd argues that three points are central to its demise industrial life cycles the international division of labour and the energy crises of 1973 His work begins with despondency in western shipbuilding going back as early as 1956 when Japan usurped Britain as the pre eminent ship producer The book goes on to explore international trade and industry in the second half of the 20th century with analysis on industrial reorganisation and East Asian conglomerates diversification with the marine industries and shipbuilding in Brazil India and China **New Enterprises** Sue Birley, 1982-01-01 Saps,

Blackjacks and Slungshots: A History of Forgotten Weapons Robert Escobar, 2018-05-31 *Revival: Cartels, Concerns and Trusts (1932)* Robert Liefmann, 2018-05-08 This volume makes available to English readers the best known and most

frequently quoted study of industrial combination from the German point of view There is an abundance of literature on the trusts from economists who have lived close to that evolution and the trusts by their more challenging position were for two decades the centre of the discussion which turned on what in industry was safe for democracy Meanwhile in Germany the alternative of the cartel was having a less noticed a controversial development until in Westphalia there was created out of lower forms a working model which was new and unique in the manner in which it related producers to each other and to the market In only a few industries has this model been fully established but it presents a rival type to the trusts and places the problem of combination on a different basis of analysis and tendency The distinction between these two forms may be a matter of industries or of national law and psychology or they may work together the cartel being the general envelop within which fusions are created the types are nevertheless distinct so much so that rationalization as a general term rather denotes than defines them both IN America the Cartel is illegal so that industry has sought its administrative solution in fusions in England trusts and cartels co exist in Germany they are interlaced great trusts having their feet in one cartel their shoulders in another and their heads in a third      *Reader's Guide to the Social Sciences* Jonathan Michie,2014-02-03 This 2 volume work includes approximately 1 200 entries in A Z order critically reviewing the literature on specific topics from abortion to world systems theory In addition nine major entries cover each of the major disciplines political economy management and business human geography politics sociology law psychology organizational behavior and the history and development of the social sciences in a broader sense      *Takin' Care of Business* George Case,2021-03-05 By the early 1970s practically everyone under a certain age liked rock music but not everyone liked it for the same reasons We typically associate the sounds of classic rock n roll with youthful rebellion by juvenile delinquents student demonstrators idealistic hippies or irreverent punks But in this insightful and timely book author George Case shows how an important strain of rock music from the late 1960s onward spoke to and represented an idealized self portrait of a very different audience the working class Average Joes who didn t want to change the world as much as they wanted to protect their perceived place within it To the extent that working class populism describes an authentic political current it s now beyond a doubt that certain musicians and certain of their songs helped define that current By now rock n roll has cast a long shadow over hundreds of millions of people around the world not just over reckless kids but over wage earning parents and retired elders not just over indignant youth challenging authority but over indignant adults challenging their own definition of it Not only have the politics of rock fans drifted surprisingly rightward since 1970 some rock as Case argues has helped reset the very boundaries of left and right themselves That God guns and Old Glory can be understood to be paid fitting tribute in a heavy guitar riff delivered by a long haired reprobate in blue jeans but that Me Too Occupy Wall Street or Black Lives Matter might not hints at where those boundaries now lie      **Accountability and Corporate Human Rights Violations in Tort and International Law** Emmanuel Nartey,2021-10-04 This volume identifies a coherent legal principle in order to establish a novel duty of care for

corporate human rights violations and environmental damages It examines whether tort and civil law offer better accountability and remedies for victims of corporate human rights abuses and carries out an in depth and critical analysis of the concept of corporate accountability Moreover a fundamental part of this book is devoted to examining the extent to which international criminal law influences international human rights law in its use of tort law and civil law remedies Finally the book sets out a theoretical mechanism for duty of care as well as a proposal for the establishment of a Hybrid International Transnational Corporation Court that would have the potential to effectively interpret the concept of the corporate duty of care under tort law
