The History of American Art Education Peter Smith, 1996-07-22 The ideas people and events that developed art education are described and analyzed so that art educators and educators in general will have a better understanding of what has happened and is happening to visual art in the schools Peter Smith raises the issue of art education's inordinate emphasis on Eurocentric art He challenges the often expressed notion that the field of education is the cause of art education's problems and proposes that confused conceptions within the art world are just as much a root of the difficulty No other book in art education history gives such close and analytical attention to the careers of women in the field The materials on Germanic cultural and historical influences are unequalled as is the scholarly treatment of Viktor Lowenfeld probably the most influential single figure in 20th century American art education
