Philosophy and Political Economy James Bonar, 2017 This volume is one of the most remarkable works in the history of economic thought First published in 1893 its principal significance rests in its argument that economic theory however technical or pragmatic is necessarily formed by and derives its meaning from larger moral and philosophical systems and assumptions Bonar traces the inexorable presence of this moral and philosophical element in a vast though highly nuanced survey of the economic aspect of major thinkers from Plato to Darwin and demonstrates how modern economic thought in turn grew out of one or another branch of philosophy Bonar begins with a consideration of Plato and Aristotle examining their conceptions of wealth production and distribution and civil society Discussions of the Stoics Epicurians and early Christianity explore complications introduced by these bodies of thought His analysis of the classical and medieval world is followed by an extensive treatment of the concept of natural law from the Renaissance through the Enlightenment describing its influence and its relation to ideas of natural rights The book's later sections concentrate on the dominant modes of nineteenth century thought utilitarianism idealism and materialism Bonar identifies and explores the philosophical topics on which the conduct of technical economic analysis makes assumptions human nature and human wants the nature and role of the state the relation of the individual to society the nature and origin of property and the role of ideals in socioeconomic life He concludes by examining the implications for economics of the theory of evolution arising from the work of Darwin and others The continuing interest of this volume for economists philosophers and sociologists lies in Bonar's contention that at the heart of the relationship of philosophy to economics is the problem of order the ongoing need to reconcile conflicts between freedom and control continuity and

change hierarchy and equality In his reading the fundamental question to which philosophy and economics are both brought to bear is that of changing the structure of power and opportunity in the social economy This is in short a classic in the history of economics as well as the economic element in intellectual history Provided by publisher **Human Action**
