interactions of a small group of these intelligent non human primates who live in Singapore Zoo Drawing upon his years of detailed observations Matthews offers an in depth analysis and interpretation of chimp behaviour to present an unprecedented account of the beginnings of symbolic thought The book shows that the actions the chimpanzees perform have structural and semantic similarities with the actions of emergent expression and representation we find in human infancy Of great importance is the finding that chimpanzee mark making activity is not an artefact of human interference but part of chimpanzee culture Young chimpanzees seem to be introduced to acts of pretence and imagination by older and more experienced ones and taught the rudiments of expression representation and symbolism The implications for our understanding of symbolism language art and education are enormous as are those about our origins and our place within nature The book is written in an accessible style for both specialist and non specialist readers and illustrated with the author's drawings and photographs
