

# PLAYGROUND SAFETY GUIDE

## FOR PARENTS

**1** Maintain a visual line of sight with children.

**2** The opening in playground equipment should be less than 3.5 inches or larger than 9 inches so a head can't get caught.

**3** Check metal slides to make sure they're not too hot to touch.

**4** Make sure kids wear shoes or sneakers in the playground to protect their feet.

**5** The length of soft surface under swings should be double the height of the swing set.

**6** Choose playground equipment that's right for your kids' size and age. Toddlers can't use metal swings, seesaws, and slides yet.

**7** Place rubber mulch, mats, or soft surface under the playground to cushion falls.

**8** Inspect playground and sandbox for splintered wood, broken glass, sharp metal, uncovered chains or loose bolts, wet spots, or missing ladder rungs.

**9** Remove necklaces, scarves, purses, clothes with drawstrings, or clothing that may get caught.

**10** Apply sunscreen on kids before letting them play in the sun.

**11** Fence the playground in so kids can't run into traffic.

Gordon Biddle, Ana Garcia-Nevarez, Wanda J. Roundtree Henderson, Alicia Valero-Kerrick, 2013-01-02 Turning passion into practice as a professional early childhood educator Early Childhood Education Becoming a Professional is an inspiring introduction to the world of early childhood education preparing the teachers of tomorrow to reach their full potential in their schools and communities Written by a diverse and experienced author team this text engages readers to connect contemporary educational and developmental theory and research to developmentally appropriate practices and applications that are easily implemented in the classroom In response to today s ever changing educational environment the text focuses on both the importance of taking personal and

professional responsibility as well as today's issues in diversity from supporting children with exceptionalities to supporting children and families in broader cultural contexts

**Linking Architecture and Education** Anne Taylor, 2009-05-16 For the past forty years Anne Taylor has studied how schools classrooms playgrounds homes museums and parks affect children and how they learn As a result she has developed a holistic sustainable philosophy of learning environment design She argues persuasively that architects must integrate their design knowledge with an understanding of the developmental needs of learners while at the same time educators parents and students must broaden their awareness of the built natural and cultural environment to maximize the learning experience In other words schools and other environments can themselves become three dimensional textbooks When architects are cognizant of newer models of education and educators view the environment as more than a box in which to teach prescribed lessons the result is an informed architecture that enables children to discover the power of their own learning The book presents numerous examples of dynamic designs that are the result of interdisciplinary understanding of place Taylor includes designer perspectives forums derived from commentary by outside contributors involved in school planning and a wealth of photographs of thoughtful and effective solutions to create learning environments from comprehensive design criteria Because the concept of school is enlarged to a community campus the book also spawns a new model of teaching and learning This book is essential reading for educators architects and community members who are anxious to transform education in America and elsewhere Anne Taylor is the most outstanding educator leading proponent and practitioner in the three dimensional textbook field Her work is the finest resource available for connecting students young and old to their learning environments and visa versa Edward E Kirkbride NCARB REFP

Before Western man divided the universe into discrete subject matter areas the order in the universe was and still is both interdisciplinary and holistic The branching of trees spiraling of shells meandering of streams and the radial designs of flowers for example represent an analogy of mathematics biology and art The current artificial separation of subject matter is in contrast to the way the world is constructed and the way children perceive it Architecture and the study of the built natural and cultural environment synthesize the world of material things and the world of ideas Further more it helps us to realize that we are a part of not apart from the environment This book is a tool and a gift to designers educators and students everywhere to assist them in seeing the meaning behind all that we view and use for living on earth To know our precious relationship to our surroundings is the intent of this book In this way life is a work of art and each of us is an artist Anne Taylor
