formed as well as a memory aid that connects the sign visually to the meaning that it conveys While the Simplified Sign System originally was developed to meet the needs of persons with intellectual disabilities cerebral palsy autism or aphasia it may also assist the communication needs of a wider audience such as healthcare professionals aid workers military personnel travellers or parents and children who have not yet mastered spoken language The system also has been shown to enhance learning for individuals studying a foreign language Lucid and comprehensive this work constitutes a valuable resource that will enhance the communicative interactions of many different people and will be of great interest to researchers and educators alike **Bedford's Tech Edge** ,2003 *Edexcel AS Geography Student Unit Guide: Unit 2 Geographical Investigations* David Holmes,Bob Hordern,2011-12-09 Written by senior examiners David Holmes and Bob Hordern this
