Winning with Words Brian F. Schaffner, Patrick J. Sellers, 2009-09-10 Today's politicians and political groups devote great attention and care to how their messages are conveyed. From policy debates in Congress to advertising on the campaign trail they carefully choose which issues to emphasize and how to discuss them in the hope of affecting the opinions and evaluations of their target audience. This groundbreaking text brings together prominent scholars from political science, communication, and psychology in a tightly focused analysis of both the origins and the real-world impact of framing. Across the chapters, the authors discuss a broad range of contemporary issues from taxes and health care to abortion, the death penalty, and the teaching of evolution. The chapters also illustrate the wide-ranging relevance of framing for many different contexts in American politics, including public opinion, the news media, election campaigns, parties, interest groups, Congress, the presidency, and the judiciary.

Designing Instruction Judith K. March, Karen H. Peters, 2008 A fresh new approach that strengthens the need for teaching with creative thinking strategies for administrative leadership teams. Few textbooks have such detailed examples combined with the background study of best practices. The authors have great credibility, experience, resources, and abundant research to support their proposal. A very well-written text offering ample review of the research.

Sara E. Spruce, Professor of Education, Olivet Nazarene University. Use this research-based instructional model to meet students' achievement goals. As the achievement gap between advantaged and disadvantaged students gets wider, teachers and administrators need a proven process to help all students meet the requirements of NCLB. This practitioner-friendly guidebook provides a step-by-step approach to a complete standards-based curriculum and the integration of best practices into the delivery and assessment of instruction in every classroom. The authors present three capacity-building features of the design process: 1. training for building leadership teams to help teachers plan and lead the reform process; 2. stewardship training to assist district administrators and principals in supporting and sustaining the implemented reforms; and 3. a collaborative observation process to help teachers work together and in partnership with principals to monitor and improve classroom instruction. Offering an education model that has been field-tested with more than 50 school districts in the U.S. and Canada, this book shows school leaders how to maximize collaborative observation and other team leadership processes to integrate reforms into a school's existing culture. Educators will learn ways to integrate instructional design with successful instructional reform. Strengthen the learning culture through standards. Develop effective performance indicators. Apply curriculum mapping to instructional design. Designing Instruction supports teachers and administrators working together to raise student achievement by using proven instructional design and best practices.
