Introduction I was just listening to an old traditional English song John Barleycorn describing the traditional cultivation of this most important food grain and began to wonder how I did not know anything much about barley even though I consider myself a botanist with a good knowledge of cereals greens plants herbs and other precious gifts of nature to mankind And then I began to wonder whether I had been seeing barley throughout my life but it was not registering consciously And then I was talking to a horticultural professor friend asking him the difference between oats and barley and he told me that both are totally different Oats are cereals and their grains are used for fodder and for food The scientific name of oats is *Avena Sativa* Today we commonly use them for breakfast food in the form of oatmeal porridge flour for biscuits and cookies especially when it is mixed up with flour of other grains like wheat And of course granola cannot do without oats And like cereals like rice and barley fermented oats are capable of producing beer as mankind found millenniums ago In fact when I was reading the old English origin and etymology of barley it was then called *b re* And in many parts of Asia the ancient as well as modern day equivalent is *baajra* but it is used for millet Was it possible that I knew what barley was but because I did not know the traditional local or vernacular name I was confusing it with some other cereal This much I know that the grass family also known as *Gramineae* produced the grain which has been the important medium of survival for animals and humanity Ever since the world began mankind has survived on six important cereals present all over the world wheat rye rice maize oats and barley All of the cereals were very rich in vitamins fats proteins as well as carbohydrate content Today the word grain is synonymous with the product of the member of the family *Graminae* or the cereal plant itself And here I was I recognized wheat rice maize also known as corn oats and rye But in many parts of Eurasia I came across another cereal which was called Millet It took me around 40 years to understand the difference between barley and millets especially when I was just looking at the spikelets even though millets also happen to be cereals      *Beer 101 North* Jon C. Stott,2017-08-08 Oregon and Washington have been leaders in the craft beer boom that began in the 1980s The number of craft breweries and brewpubs in the U S has increased dramatically in recent years almost 4700 were doing business as of mid 2016 Much of this growth has taken place in the metropolitan areas of Portland and Seattle and in sizable cities like Eugene Salem Spokane and Tacoma Yet many breweries have opened in villages and small towns The author visits more than three dozen in this exploration of the vibrant craft brew scene along the coast of the Pacific Northwest Profiles of brewers and owners and descriptions of breweries and their settings are provided along with tasting notes on more than 200 beers      The Hop
