Hellrich,2019-08-08

Word embeddings are a form of distributional semantics increasingly popular for investigating lexical semantic change However typical training algorithms are probabilistic limiting their reliability and the reproducibility of studies Johannes Hellrich investigated this problem both empirically and theoretically and found some variants of SVD based algorithms to be unaffected Furthermore he created the JeSemE website to make word embedding based diachronic research more accessible It provides information on changes in word denotation and emotional connotation in five diachronic corpora Finally the author conducted two case studies on the applicability of these methods by investigating the historical understanding of electricity as well as words connected to Romanticism They showed the high potential of distributional semantics for further applications in the digital humanities      **Learn & Use Inspiration in Your Classroom** Erin K.
