Metrics	Abstract
Received: 26.05.2023 Revised: 20.12.2023 Accepted: 2.01.2024 Published online: 25.03.2024	In an innovative attempt to engage adolescents and young adults in emergency preparedness, the Centers for Disease Control & Prevention (CDC) introduced its Preparedness 101: Zombie Pandemic entertainment-education initiative in 2011. This development received widespread attention and such popularity that the CDC's website crashed as a result of the number of users attempting to access it. However, despite this atypical publicity, concerns have been raised about using this approach. Some of the concerns focus on the efficacy of the zombie scenario to promote emergency preparedness. Others have raised the issue of this theme promoting an unhealthy focus on weapons. To date the majority of this research noting the link between using such a theme and supporting a weapons culture has examined primary school children. This research uses content and reflexive thematic analysis to explore this potential unanticipated side-effect among a public audience. Five years of data from the CDC online blog was examined. Results indicate that over 10% of blog posts mentioned weapons. A number of themes of concern were identified from the blog posts relating to firearms, weapons, and killing. Although the CDC's innovation is to be commended for its popular appeal, the use of a zombie theme links the campaign to wider media narratives that foreground weapons. As such it is recommended that such a theme should not be used in future public health interventions.

Entertainment-Education

Entertainment-education (EE) is the 'process of purposely designing and implementing a media message to both entertain and educate in order to increase audience members' knowledge about an educational issue, create favorable attitudes, shift social norms, and change the overt behavior' [1]. EE has frequently been used to explore health issues in industrializing countries [1-5], often via a television or radio soap opera or [4,6-8]. EE has the advantage of being relatively low cost [3,9], engaging [10], and theoretically robust [11-13].

Zombies in Popular Culture

Haitian zombie folklore was introduced into Western consciousness via Victor Halperin's 1932 black & white movie *White Zombie*, starring Bela Lugosi. This film was followed approximately a decade later (1943) by *I Walked with a Zombie*. However, attention on this topic was not substantively rekindled until George A. Romero's *Night of the Living Dead* was released in 1968. This franchise was developed through a series of six subsequent movies over the following four decades: *Dawn of the Dead* (1978), *Day of the Dead* (1985), *Night of the Living Dead* (1990), *Land of the Dead* (2005), *Diary of the Dead* (2007), and *Survival of the Dead* (2009). The cause of the zombification in movies has varied over time from sorcery-induced reanimation to pandemic infection.

CDC's Preparedness 101: Zombie Pandemic Center for Disease Control, 2011 Inspired by a blog that caused a huge stir in the zombie apocalypse preparedness world the Centers for Disease Control and Prevention's Preparedness 101 Zombie Pandemic is a graphic novel about the plans and supplies required to survive an emergency situation While zombie fans and expert zombie ologists believed the work was not worthy of its title the CDC admitted the idea was more to alert the community about emergency preparedness in general not the threat of an actual zombie apocalypse Despite this statement and another official report stating the CDC knows of no disease that would cause the dead to reawaken some conspiracy theorists still believe that the CDC knows something about a potential zombie pandemic
