Seltzer,TranStar Airlines,1987 **Aircrew Training Manual** Department of the Army,2003-04-29 This training circular TC
addresses training guidance for all C 12 aircraft It establishes crewmember qualification and refresher mission and
continuation training requirements Used with TC 1 210 this manual will help aviation commanders at all levels develop a
comprehensive aircrew training program Two fatal training accidents occurred in Guardrail RC 12 aircraft After these
accidents the commanding general of the U S Army Intelligence Center and Fort Huachuca Fort Huachuca Arizona directed
reexamination of Guardrail aircrew training A yearlong study team reviewed aircraft certification and applicable Federal
Aviation Regulations The team conducted extensive discussions with the Federal Aviation Administration to gain an
understanding of the context of pilot training versus the size of the airframe Raytheon test pilots explained the operator s
manual performance charts and their use In addition the team went outside the Army to examine how other Super King Air C
12 schools conduct training The team conducted interviews and examined the training literature of the U S Navy Flight
Safety International Simuflite and the U S Air Force The flight tasks and the base task list reflect the outcome of this study
The study team carefully evaluated training benefit versus risk during the task development phase It made the following
changes integrated crewmembers into training standardized crew callouts added behavior outcomes to standards and
allowed flexibility in the description of flight tasks These changes ensure pilots are not penalized for using their judgment
Takeoff and landing data cards adopted from the civilian section allow aircrews to develop a takeoff plan for an emergency
should it occur after V1 Flight simulator training is now a mandatory element of aircrew training High risk training will be
performed in the simulator instead of the airplane In addition a maintenance designated instructor pilot has replaced the
maintenance test pilot evaluator **DC10 Flight Crew Operating Manual** McDonnell Douglas Corporation,1974 **The
B-29 Airplane Commander Training Manual for the Superfortress.** by U.s. Army Air Force,2017-01-12 The Boeing B 29
was one of the most sophisticated aircraft of WWII It featured many innovations including guns that could be fired by remote
control and pressurized crew compartments It was also the heaviest production plane of the war with terrific range and
bomb carrying capabilities Carrying a crew of ten the Superfortress devastated Japan in a series of raids in 1944 45 Finally in
August of 1945 the B 29s Enola Gay and Bock s Car dropped the atomic bombs and forced Japan to surrender Originally
printed by the U S Army Air Force this B 29 Airplane Commander Pilot s Training Manual taught pilots everything they
needed to know about the Superfortress Classified Restricted the text was declassified long ago and is here reprinted in book

form THIs MANUAL is the text for your training as a B 29 pilot and air plane commander The Air Forces most experienced training and supervisory personnel have collaborated to make it a complete exposition of what your pilot duties are how each duty will be performed and why it must be performed in the manner prescribed The techniques and procedures described in this book are standard and mandatory In this respect the manual serves the dual purpose of a training checklist and a working handbook Use it to make sure that you learn everything described herein Use it to study and review the essential facts concerning everything taught Such additional self study and review will not only advance your training but will alleviate the burden of your already overburdened instructors This training manual does not replace the Technical Orders for the airplane which will always be your primary source of information concerning the B 29 so long as you fly it This is essentially the textbook of the B 29 Used properly it will enable you to utilize the pertinent Technical Orders to even greater advantage
