Manual for Pacemaker and ICD Devices Amin Al-Ahmad,Andrea Natale,Paul J. Wang,James P. Daubert,Luigi Padeletti,2018-03-20 A complete how to do it guide to planning, programming, implementing and trouble shooting today's pacemakers and other implantable cardiac devices. Edited by a team of leading clinician educators, this is a practical go to reference for trainees and clinical staff who are new to or less experienced with the programming and management of implantable devices. It distills device best practices into a single quick reference volume that focuses on essential tasks, common pitfalls and likely complications. Each chapter follows a hands on how to do it approach that helps readers quickly master even the most challenging device related tasks such as programming and how to respond confidently when complications arise. Today's pacemakers and other implantable EP devices are no earlier versions; what smart phones are to rotary phones. They are not only smaller and more comfortable, they offer complex programming options that allow clinicians to adapt a device to individual patient requirements. As they continue to become smaller, smarter and more adaptable, these devices also become more challenging for clinicians to set up, manage and monitor. This unique quick reference guide dramatically reduces the learning curve for mastering this essential technology by giving doctors and technicians the how to information they need. Focuses on tasks clinicians perform including pre implementation, planning, programming, management, troubleshooting and more. Shows how expert clinicians achieve optimal outcomes in their own labs with real world examples. Features more than 300 images including ECGs, X ray and fluoroscopy images from device interrogation, intracardiac electrograms and color electroanatomical maps. Provides eight videos on an accompanying website demonstrating key tasks and techniques. Also available in an eBook version enhanced with instructional videos. **How to Manual for Pacemaker and ICD Devices** is an indispensable tool of the trade for electrophysiologists, fellows in electrophysiology, EP nurses, technical staff and industry professionals.
