**Intimate Strangers** Andreea Deciu Ritvoi, 2014-08-26 Hannah Arendt Herbert Marcuse Alexander Solzhenitsyn and Edward Said each steered major intellectual and political schools of thought in American political discourse after World War II yet none of them was American which proved crucial to their ways of arguing and reasoning both in and out of the American context In an effort to convince their audiences they were American enough these thinkers deployed deft rhetorical strategies that made their cosmopolitanism feel acceptable inspiring radical new approaches to longstanding problems in American politics Speaking like natives they also exploited their foreignness to entice listeners to embrace alternative modes of thought *Intimate Strangers* unpacks this stranger ethos a blend of detachment and involvement that manifested in the persona of a prophet for Solzhenitsyn an impartial observer for Arendt a mentor for Marcuse and a victim for Said Yet despite its many successes the stranger ethos

did alienate many audiences and critics continue to dismiss these thinkers not for their positions but because of their foreign point of view This book encourages readers to reject this kind of critical xenophobia throwing support behind a political discourse that accounts for the ideals of citizens and noncitizens alike Tax Reform and the Tax Treatment of Financial Products United States. *Public Education—America's Civil Religion* Carl L. Bankston, Stephen J. Caldas, 2015-04-18 In this volume the authors argue that public education is a central part of American civil religion and thus gives us an unquestioning faith in the capacity of education to solve all of our social economic and political problems The book traces the development of America's faith in public education from before the Civil War up to the present exploring recent educational developments such as the No Child Left Behind legislation The authors discuss how this faith in education often makes it difficult for Americans to think realistically about the capacities and limitations of public schooling Bringing together history politics religion sociology and educational theory this in depth examination raises fundamental questions about what education can accomplish for the citizens of the United States points out that many supposedly opposing viewpoints on public education actually arise from the same root assumptions exposes the gaps between our pursuit of equity in schools and what we really accomplish with students looks at ways in which education can be organized to serve a diverse population
