Southern Common Market A core argument of this book running through all chapters is that region building must be recognized as a political project as much as if not more than an economic one successful region building in Africa will need to include the complex political tasks of strengthening state capacity including states capacity as developmental states that can actively engage in economic planning resolving long standing conflicts over resources and political dominance improving democratic governance and developing trans national political structures that are legitimate and inclusive

Africa's Progress in Regional and Global Economic Integration - Towards Transformative

Regional Integration Achim Gutowski, Tobias Knedlik, Patrick N. Osakwe, Isabelle Ramdoo, Karl Wohlmuth, 2016 Based on Africa's deep rooted structural problems the key aspect of a transformative regional integration is how to promote structural transformation by adapted strategies and policies for the African regional economic communities for the Continental Free Trade Area and for the Tripartite Free Trade Area Regional integration in Africa is based on a conventional linear model starting with trade preference zones and moving to free trade areas customs unions and monetary and economic zones with the ultimate goal to reach political unity Specific problems of a more transformative regional integration agenda are discussed such as food security and agriculture industry development enterprise growth and competition and economic partnership agreements with extra regional partners In the final section the impact of three global value chains of importance for Africa diamonds shea butter and sesame are considered on regions on sub regions and on regional integration Series African Development Perspectives Yearbook Vol 18 Subject African Studies Economics *Regional Economic Integration in West Africa* Diery Seck, 2013-11-18 This book presents a number of key studies pertaining to the most pressing challenges of economic regional integration in West Africa The issues of monetary coordination foreign exchange volatility taxation savings and macroeconomic convergence are investigated from a regional perspective The characteristics of West Africa's trade policy are reviewed and assessed in comparison to that of the Southern African Development Community SADC The extent to which regional integration can tackle the challenge of unemployment is the focus of studies on labour markets Development of the private sector and coordination of regional cross border transportation are examined through the lens of economic collaboration between Arab and African countries The book provides fresh new answers to persistent development questions and sheds new light on long held views that are either incomplete or no longer true It also opens new perspectives on the search for sustainable avenues for Africa's development In this regard it may contribute to the emergence of a new paradigm on Africa's development process and its science based policy oriented implementation *Routledge Handbook of Public Policy in Africa* Gedion Onyango, 2021-12-30 This Handbook provides an authoritative and foundational disciplinary overview of African Public Policy and a comprehensive examination of the practicalities of policy analysis policymaking processes implementation and administration in Africa today The book assembles a multidisciplinary team of distinguished and upcoming Africanist scholars practitioners researchers and policy experts working inside and outside Africa to analyse the historical and emerging policy issues in 21st century Africa While mostly attentive to comparative public policy in Africa this book attempts to address some of the following pertinent questions How can public policy be understood and taught in Africa How does policymaking occur in unstable political contexts or in states under pressure Has the democratisation of governing systems improved policy processes in Africa How have recent transformations such as technological proliferation in Africa impacted public policy processes What are the underlying challenges and potential policy paths for Africa going forward The contributions examine an interplay of prevailing institutional political structural challenges and opportunities for

policy effectiveness to discern striking commonalities and trajectories across different African states This is a valuable resource for practitioners politicians researchers university students and academics interested in studying and understanding how African countries are governed *Regional Integration in Africa* Peter Anyang' Nyong'o,1990

Nation-states and the Challenges of Regional Integration in West Africa Yomi Akinyeye,2010 Since their independence Africa states West in particular have felt a need for regional integration in order to solve their development problems Various aspects of Nigeria s experience in regional integration are there examined These include the advocacy of chambers of commerce for common currencies among members of the West African Monetary Zone security implications of defense pacts between some francophone member countries and France and grassroots participation to solve problems concerning borders and borderlands Finally facilitators and obstacles of regional integration are examined *Regional Integration in Africa* Jaime De Melo,Yvonne M. Tsikata,2015 Political motives geography and the uneven distribution of gains trumped the traditional efficiency gains across Africa s Regional Economic Communities RECs The small sparsely populated fragmented and often isolated economies across Africa make a compelling case for these economies to integrate regionally to reap efficiency gains exploit economies of scale and reduce the thickness of borders But lack of complementarities among partners and diminishing returns to the exploitation of resources has reduced supply response to market integration oriented regional policies Additionally a very uneven distribution of resources has sharpened the trade off between the benefits of common policies needed to tackle cross border externalities and their costs which are heightened by the sharp differences in policy preferences across members African RECs have pursued the linear model of integration with a stepwise integration of goods labour and capital markets as well as eventual monetary and fiscal integration With the exception of the franc zone the RECs have not yet completed goods markets integration the lack of adjustment funds to address the uneven distribution of benefits across partners contributing to the delay Estimates reported here reveal the shortcomings of the linear model of integration as behind the border measures aiming to reduce trade costs were largely ignored across African RECs until recently While this is probably due to the difficulty in gaining the confidence necessary to get collection action started many behind the border measures could still have been undertaken unilaterally *Regional Integration and Trade in Africa* Mthuli Ncube,I. Faye,A. Verdier-Chouchane,2014-12-21 This book reviews the current trends and challenges of regional integration and trade in Africa It provides valuable policy recommendations aimed at stimulating the debate among the government private sector and development community on the ways to promote regional trade for Africa s economic development

The Performance of Africa's International Courts James Thuo Gathii,2020-11-26 The performance of international courts has traditionally been judged against criteria of compliance and effectiveness Whilst these are clearly desirable objectives for litigants before Africa s international courts this book shows that we must look beyond these criteria to fully appreciate the impact of these courts This book shows how litigants use their participation in international litigation to

achieve other objectives to amplify political disputes with their governments to build their movement to educate the public about their cause and to challenge the status quo Chapters in this collection show how these courts act as coordination points for opposition political parties to name and shame dominant parties for violation of their organizational rights Others demonstrate how Africa s international courts serve as transitional justice mechanisms in which truth telling about ongoing conflict and authoritarian governance receives significant attention This attention serves as a platform to galvanize resistance against continued authoritarian rule especially from outside the conflict countries Ultimately the book shows that these courts must be judged against new and broader criteria and understood as increasingly important venues for waging political social environmental and legal struggles
