

Forensic interviewing - week 4

The Reid technique

The Reid technique:

- Developed with FBI
- Approach developed used in USA (discourage from use in aus)

Stage 1:

- Non-accusatory, unstructured information-gathering process, where officer determines suspect's guilt/innocence (note-taking)
- Casual
- Non-accusatory
- Data gathering = their story/presentation

Stage 2

- Interrogation: accusatory persuasive approach, only conducted when officer has reasonable grounds to believe suspect is guilty (no note taking)
- This is because you look like you still don't know but you are accusing them

Reid technique: 9 step interrogation:

1. Direct, positive confrontation:
 - Confront the suspect with a statement that he/she is considered to be the person who committed the crime
 - Pause to evaluate the suspect's verbal/non verbal response
2. Theme development:
 - Propose a reason for the crime's commission. Theme depends on how emotional suspect is
 - Emotional suspect: use minimisation techniques that underplay seriousness of crime & provide excuses to relieve guilt (e.g., blame co-offenders)
 - Non-emotional suspect: use maximisation techniques that exaggerate evidence & suggest it is pointless to deny guilt
3. Handling denials: discourage denial and return to theme developed in stage 2
4. Overcoming objections:
 - Allow some explanations and express understanding, truthful tends to be more direct "i did not kill my wife" non truthful tends to be less direct "that's not possible, i would never do that" continue to build rapport and trust
5. Procurement and retention of suspect's attention: move closer with eye-contact
6. Handling suspect's passive mood: offer motives while maintaining sympathetic persona
7. Presenting an alternative question:
 - suspect given choice between 2 explanations of crime (one more acceptable/understandable than the other)
8. Develop details of the offence:
 - After an alternative is chosen, have suspect orally relate details of offence - establishes legal guilt
9. Written confession:
 - Converting oral confession into written statement, signed by suspect

Ethical reminders:

- Risk of eliciting false confessions

Why We Remember Charan Ranganath, PhD, 2025-02-11 NEW YORK TIMES BESTSELLER LOS ANGELES TIMES BESTSELLER Memory is far more than a record of the past In this groundbreaking tour of the mind and brain one of the world's top memory researchers reveals the powerful role memory plays in nearly every aspect of our lives from recalling faces and names to learning decision making trauma and healing *Why We Remember* offers a radically new and engaging explanation of how and why we remember Dr Matthew Walker author of *Why We Sleep* Prominent neuroscientist and Guggenheim Fellow Charan Ranganath guides us through the science of our memories with incredible insight and clear science He combines fascinating tales of the peculiarities of memory with practical actionable steps Not only will every reader remember better afterward they'll also never forget this life changing book Siddhartha Mukherjee Pulitzer Prize winning author of *The Emperor of Maladies* and *Gene* A new understanding of memory is emerging

from the latest scientific research In *Why We Remember* pioneering neuroscientist and psychologist Charan Ranganath radically reframes the way we think about the everyday act of remembering Combining accessible language with cutting edge research he reveals the surprising ways our brains record the past and how we use that information to understand who we are in the present and to imagine and plan for the future Memory Dr Ranganath shows is a highly transformative force that shapes how we experience the world in often invisible and sometimes destructive ways Knowing this can help us with daily remembering tasks like finding our keys and with the challenge of memory loss as we age What's more when we work with the brain's ability to learn and reinterpret past events we can heal trauma shed our biases learn faster and grow in self awareness Including fascinating studies and examples from pop culture and drawing on Ranganath's life as a scientist father and child of immigrants *Why We Remember* is a captivating read that unveils the hidden role memory plays throughout our lives When we understand its power and its quirks we can cut through the clutter and remember the things we want to remember We can make freer choices and plan a happier future *Essentials of Paleomagnetism* Lisa Tauxe, 2010-03-19

More than 400 years ago William Gilbert said The Earth itself is a great magnet Today we know that it is also a great magnetic tape recorder This work is a comprehensive up to date textbook on extracting and using rock and paleomagnetic data in archaeological geological and geophysical applications Designed for students and professionals with knowledge of college level physics and some background in earth sciences it describes both the theory and the practice of paleomagnetism covering topics such as the basics of magnetism geomagnetic fields how rocks become magnetized and the various ways of analyzing the magnetism of rocks The book uses the companion PmagPy software package An appendix contains a brief introduction to Python an easy to use cross platform and most important free programming environment in which PmagPy programs are written **The Palgrave Handbook of Deceptive Communication** Tony Doonan-Morgan, 2019-04-29

Deception and truth telling weave through the fabric of nearly all human interactions and every communication context The Palgrave Handbook of Deceptive Communication unravels the topic of lying and deception in human communication offering an interdisciplinary and comprehensive examination of the field presenting original research and offering direction for future investigation and application Highly prominent and emerging deception scholars from around the world investigate the myriad forms of deceptive behavior cross cultural perspectives on deceit moral dimensions of deceptive communication theoretical approaches to the study of deception and strategies for detecting and deterring deceit Truth telling lies and the many grey areas in between are explored in the contexts of identity formation interpersonal relationships groups and organizations social and mass media marketing advertising law enforcement interrogations court politics and propaganda This handbook is designed for advanced undergraduate and graduate students academics researchers practitioners and anyone interested in the pervasive nature of truth deception and ethics in the modern world **Lies** Rachelle M.

Smith, 2022-01-11 This encyclopedia examines the phenomenon of deception from a variety of perspectives and in a multitude

of contexts It offers readers an accessibly written and engaging resource that sheds light on when why and how we lie Ironically it seems to be a universal truth that everyone lies From innocent white lies to elaborate deceptions humans appear to be hard wired for dishonesty But what psychological or evolutionary purpose does lying serve What motivates us to lie and what effects do such lies have on those around us and on our own physiology and mental health What are the differences between types of lies and how do various forms of dishonesty manifest themselves in such areas as politics advertising and social media And perhaps most importantly how can we spot liars in our everyday lives and encourage those around us and even ourselves to be more honest Lies The Science behind Deception provides a broad and multifaceted introduction to this fascinating topic More than 175 entries address the many forms of lying the purpose and development of such behaviors and their consequences It also includes practical sidebars that help readers to deal with lying and liars in their own lives
