Molecular and Cellular Aspects of the Drug Addictions Avram Goldstein, 2012-12-06 In 1970 I gave up the chairmanship of the Department of Pharmacology at Stanford University School of Medicine to devote full time to basic and clinical research on problems of drug addiction In 1971 I developed the method of radioligand binding that led to the important characterization of opioid receptors in several laboratories The extraordinary specificity of these receptors for morphine and related opiates suggested the likelihood that there were naturally occurring morphine like molecules in the brain and other tissues The systematic search for these molecules culminated in 1979 in the discovery by my group of the dynorphin peptides one of the three families of opioid peptides the first of which the enkephalin family had been discovered in Aberdeen Scotland in 1975 I also became involved in clinical research on the pharmacologic treatment of heroin addicts for which I established the first large methadone maintenance treatment program in California My basic and clinical research experience convinced me that an institution encompassing laboratory research studies on normal human volunteers and treatment research under a single roof could expedite progress in understanding the drug addictions That concept was transformed into reality by the founding in 1974 of the Addiction Research Foundation of Palo Alto California The funds for construction of a laboratory were provided by a generous grant from the Drug Abuse Council a consortium of several foundations the president of which was Thomas L Bryant *CHEMISTRY SILBERBERG, 2003 Regulation of Biological Control Agents* Ralf-Udo Ehlers, 2011-02-03 This book presents a comprehensive compilation of registration requirements necessary for authorisation of biological control agents viruses bacteria fungi active substances of natural origin and semiochemicals in OECD countries It also reviews data requirements for invertebrate agents insect mites and nematodes and provides proposals for harmonisation of the regulation process and guidelines for completion of application forms Based on results of the EU REBECA Policy Support Action which gathered experts from academia regulation authorities and industry risks and benefits of the specific agents were reviewed and proposals for a more balanced registration process elaborated including recommendations for acceleration of the authorisation process and discussions on trade off effects and policy impacts All these aspects are covered in detail in this book which points the way forward for enhanced utilisation of biological control agents *Biology/science Materials* Carolina Biological Supply Company, 1991 Addiction Medicine E-Book Bankole Johnson, 2019-12-12 Integrating scientific knowledge with today's most effective treatment options *Addiction Medicine Science and Practice* 2nd Edition provides a wealth of information on addictions to substances and behavioral addictions It discusses the concrete research on how the brain and body are affected by addictions improving your understanding of how patients develop addictions and how best to personalize treatment and improve outcomes This essential text is ideal for anyone who deals with patients with addictions in clinical practice including psychiatrists health psychologists pharmacologists social workers drug counselors trainees and general physicians family practitioners Clearly

explains the role of brain function in drug taking and other habit forming behaviors and shows how to apply this biobehavioral framework to the delivery of evidence based treatment Provides clinically relevant details on not only traditional sources of addiction such as cocaine opiates and alcohol but also more recently recognized substances of abuse e g steroids inhalants as well as behavioral addictions e g binge eating compulsive gambling hoarding Discusses current behavioral and medical therapies in depth while also addressing social contexts that may affect personalized treatment Contains new information on compliance enhancing interventions cognitive behavioral treatments behavioral management and other psychosocial interventions Includes neurobiological molecular and behavioral theories of addiction and includes a section on epigenetics Contains up to date information throughout including a new definition of status epilepticus a current overview of Lennox Gastaut syndrome and updates on new FDA approved drugs for pediatric neurological disorders Features expanded sections on evidence based treatment options including pharmacotherapy pharmacogenetics and potential vaccines Addresses addiction in regards to specific populations including adolescents geriatric pregnant women and health care professionals Includes contributions from expert international authors making this a truly global reference to addiction medicine
