

## Cover to Reinforcement (Columns: BS 8110)

The nominal concrete cover is the distance between the surface of the reinforcement closest to the nearest concrete surface (including links and surface reinforcement where relevant) and the nearest concrete surface.

You are required to set a minimum value for the nominal cover,  $c_{nom, u}$  for each column in the column properties.

These values are then checked against the nominal limiting cover,  $c_{nom, lim}$  which depends on the diameter of the reinforcement and maximum nominal aggregate size,  $h_{agg}$  (specified in Design Options > Column > General Parameters).

If  $c_{nom, u} < c_{nom, lim}$  then a warning is displayed in the calculations.
