Single-Valued Neutrosophic Set Correlation Coefficient and Its Application in Fault Diagnosis Shchur Iryna, Yu Zhong, Wen Jiang, Xinyang Deng, Jie Geng, With the increasing automation of mechanical equipment fault diagnosis becomes more and more important However the factors that cause mechanical failures are becoming more and more complex and the uncertainty and coupling between the factors are getting higher and higher In order to solve the given problem this paper proposes a single valued neutrosophic set ISVNS algorithm for processing of uncertain and inaccurate information in fault diagnosis which generates neutrosophic set by triangular fuzzy number and introduces the formula of the improved weighted correlation coefficient Since both the single valued neutrosophic set data and the ideal neutrosophic set data are considered the proposed method solves the fault diagnosis problem more effectively Finally experiments show that the algorithm can significantly improve the accuracy degree of fault diagnosis and can better satisfy the diagnostic requirements in practice

transparency and legitimacy and the relationship between CETA TTIP and TiSA on the one hand and EU law on the other It concludes with four chapters that discuss globalization and other fundamental questions surrounding these mega regional agreements from economic political science and legal perspectives **The Performance of Africa's International Courts**

James Thuo Gathii,2020-11-26 The performance of international courts has traditionally been judged against criteria of compliance and effectiveness Whilst these are clearly desirable objectives for litigants before Africa s international courts this book shows that we must look beyond these criteria to fully appreciate the impact of these courts This book shows how litigants use their participation in international litigation to achieve other objectives to amplify political disputes with their governments to build their movement to educate the public about their cause and to challenge the status quo Chapters in this collection show how these courts act as coordination points for opposition political parties to name and shame dominant parties for violation of their organizational rights Others demonstrate how Africa s international courts serve as transitional justice mechanisms in which truth telling about ongoing conflict and authoritarian governance receives significant attention This attention serves as a platform to galvanize resistance against continued authoritarian rule especially from outside the conflict countries Ultimately the book shows that these courts must be judged against new and broader criteria and understood as increasingly important venues for waging political social environmental and legal struggles Food Science
