was made that there should be a single strategy for theory development some claiming to begin the process from practice and others believing it should be driven by research Provided by publisher *Beginning Reflective Practice* Melanie Jasper,2003 This title introduces the concept of reflective practice and explains its purpose to the healthcare student or professional in the UK It demonstrates the skills necessary for effective reflective practice and explores the benefits of successful reflection in relation to pre registration profiles and Continuing Professional Development *Transformative Learning in Nursing* Arlene H.
