decade Commissioned by the Cabinet Office and using interviews British Government records and papers housed in private and institutional collections this is the first of a collaboratively written series of official histories that analyse the evolution of criminal justice between 1959 and 1997 It opens with an account of the inception of the series before describing what was known about crime and criminal justice at the time It then outlines the genesis of three key criminal justice Acts that not only redefined the relations between the State and citizen but also shaped what some believed to be the spirit of the age the abolition of capital punishment and the reform of the laws on abortion and homosexuality The Acts were taken to be so contentious morally and politically that Governments of different stripes were hesitant about promoting them formally The onus was instead passed to backbenchers who were supported by interlocking groups of reformers with a pooled knowledge about how to effectively organise a rhetoric that drew on the language of utilitarianism and the clarity and authority of a Church of England This came to play an increasingly consequential and largely unacknowledged part in resolving what were often confusing moral questions This book will be of much interest to students of criminology and British history politics and law Peterson's Guide to Two Year Colleges, 1984 Peterson,1983-11 A guide to more than 1 900 accredited two year colleges in the United States and abroad provides students with school profiles focusing on academics majors standardized testing requirements and more articles on admission and transferring and a state by state institution comparison chart

complex subject It is essential reading for students and academics from a range of disciplines including criminology human rights migration studies and political science The Spatial Scale of Crime John R. Hipp, 2022-12-09 Combining insights from two distinct research traditions the communities and crime tradition that focuses on why some neighborhoods have more crime than others and the burgeoning crime and place literature that focuses on crime in micro geographic units this book explores the spatial scale of crime Criminologist John Hipp articulates a new theoretical perspective that provides an individual and household level theory to underpin existing ecological models of neighborhoods and crime A focus is maintained on the agents of change within neighborhoods and communities and how households nested in neighborhoods might come to perceive problems in the neighborhood and then have a choice of exit voice loyalty or neglect EVLN A characteristic of many crime incidents is that they happen at a particular spatial location and a point in time These two simple insights suggest the need for both a spatial and a longitudinal perspective in studying crime events The spatial question focuses on why crime seems to occur more frequently in some locations than others and the consequences of this for certain areas of cities or neighborhoods The longitudinal component focuses on how crime impacts and is impacted by characteristics of the environment This book looks at where offenders targets and guardians might live and where they might spatially travel throughout the environment exploring how vibrant neighborhoods are generated how neighborhoods change and what determines why some neighborhoods decline over time while others avoid this fate Hipp s theoretical model provides a cohesive response to the general question of the spatial scale of crime and articulates necessary future directions for the field This book is essential for students and scholars interested in spatial temporal criminology
