The Digital Incunabula: rock • paper • pixels Patrick Aievoli, 2015-10-28 The Digital Incunabula is Patrick Aievoli's personal sonnet through media interaction and communication design. He carefully crafts each evolutionary step into ripples that are supported by his own storied professional and academic experiences. It's full of facts, terms, and historical information which makes it perfect for anyone looking to flat out learn. James Pannafino, Professor, Millersville University, Interaction Design. Well documented, well written, and well argued. Dr. Michael Soupios, Professor, Political Science, LIU Post. People who can use this book include any educators, counselors, parents, or students who are looking for information concerning design or media as a future entertainment education or the arts.

A Biography of the Pixel Alvy Ray Smith, 2021-08-03 The pixel as the organizing principle of all pictures from cave paintings to Toy Story. The Great Digital Convergence of all media types into one universal digital medium occurred with little fanfare at the recent turn of the millennium. The bit became the universal medium and the pixel, a particular packaging of bits, conquered the world. Henceforward, nearly every picture in the world would be composed of pixels: cell phone pictures, app interfaces, Mars Rover transmissions, book illustrations, videogames. In *A Biography of the Pixel*, Pixar cofounder Alvy Ray Smith argues that the pixel is the organizing principle of most modern media and he presents a few simple but profound ideas that unify the dazzling varieties of digital image making. Smith's story of the pixel's development begins with Fourier waves, proceeds through Turing machines, and ends with the first digital movies from Pixar, DreamWorks, and Blue Sky. Today, almost all the pictures we encounter are digital, mediated by the pixel, and irretrievably separated from their media museums and kindergartens are two of the last outposts of the analog. Smith explains engagingly and accessibly how pictures composed of invisible stuff become visible: that is, how digital pixels convert to analog display elements. Taking the special case of digital movies to represent all of Digital Light, his term for pictures constructed of pixels, and drawing on his decades of work in the field, Smith approaches his subject from multiple angles: art, technology, entertainment, business, and history. *A Biography of the Pixel* is essential reading for anyone who has watched a video on a cell phone, played a videogame, or seen a movie. 400 pages of annotations prepared by the author and available online provide an invaluable resource for readers.

Africa's Energy Transition George Anachebe Nwangwu,2025-08-20 This book examines the critical challenges and opportunities surrounding climate change and the energy transition in Africa While many Africans prioritize pressing concerns such as food scarcity economic development and unemployment the book argues that the continent remains particularly vulnerable to climate related impacts Erratic weather patterns and extreme events exacerbate existing issues including declining agricultural productivity infrastructure damage and political instability Despite these challenges the transition from fossil fuels to renewable energy presents significant economic opportunities for Africa The book emphasizes that embracing this shift can help African countries transform their economies and strengthen resilience against climate change It contends that the current international framework where Africa has largely anchored its demands around climate justice has yielded little tangible benefit for Africans Instead the book advocates for a shift in perspective rather than focusing solely on historical emissions from the Global North African nations should recognize the potential advantages of actively participating in the global energy economy By seizing the opportunities inherent in this transition African countries can reshape their economies and capitalize on emerging energy markets *Photon-Counting Image Sensors* Eric R.
