the relationship of philosophy to economics is the problem of order the ongoing need to reconcile conflicts between freedom and control continuity and change hierarchy and equality In his reading the fundamental question to which philosophy and economics are both brought to bear is that of changing the structure of power and opportunity in the social economy This is in short a classic in the history of economics as well as the economic element in intellectual history Economics and God's Truth Are Not Rocket Science Jim Fulkrod,2016-05-05 This book was written to help people understand that economics is a behavioral science and there are reasons for some economic policy working and other failing The book is not meant to be a text book but only give the reader what they need to ask the questions they need to find the answers they need to be a more informed voter These questions are how will people acting in their own best interest respond and how is force being used We often try to make thing more complicated then they need to be With any behavioral science it is simply people acting in their own best interest or the rational man concept that we need to focus on Many things may sound good but will they work **A**
