Middleton,Jinfa Cai,Stephen Hwang,2015-05-05 In recent years funding agencies like the Institute of Educational Sciences  
and the National Science Foundation have increasingly emphasized large scale studies with experimental and quasi  
experimental designs looking for objective truths Educational researchers have recently begun to use large scale studies to  
understand what really works from developing interventions to validation studies of the intervention and then to efficacy  
studies and the final scale up for large implementation of an intervention Moreover modeling student learning  
developmentally taking into account cohort factors issues of socioeconomics local political context and the presence or  
absence of interventions requires the use of large data sets wherein these variables can be sampled adequately and  
inferences made Inroads in quantitative methods have been made in the psychometric and sociometric literatures but these  
methods are not yet common knowledge in the mathematics education community In fact currently there is no volume  
devoted to discussion of issues related to large scale studies and to report findings from them This volume is unique as it  
directly discusses methodological issue in large scale studies and reports empirical data from large scale studies      *Algebra*
