Analytic Geometry and Principles of Algebra Alexander Ziwet, Louis Allen Hopkins, 1915 Illustrated Special Relativity through Its Paradoxes: A Fusion of Linear Algebra, Graphics, and Reality John dePillis, Jose Wudka, 2013-12-31 Assuming a minimum of technical expertise beyond basic matrix theory the authors introduce inertial frames and Minkowski diagrams to explain the nature of simultaneity why faster than light travel is impossible and the proper way to add velocities We resolve the twin paradox the train in tunnel paradox the pra shooter paradox along with the lesser known bug rivet paradox that shows how rigidity is incompatible with special relativity Since Einstein in his seminal 1905 paper introducing special relativity acknowledged his debt to Clerk Maxwell we fully develop Maxwell s four equations that unify the theories of electricity optics and magnetism These equations also lead to a simple calculation for the frame independent speed of electromagnetic waves in a vacuum Cover **Practical Algebra, 2d Course by Jos. Science Awakening I B. L. Van Der Waerden, 2012-12-06 Soon after the publication of my *Ontwakende Wetenschap* the need for an English translation was felt We were very glad to find a translator fully familiar with the English and Dutch languages and with mathematical terminology The publisher Noordhoff had the splendid idea to ask H G Beyen professor of archeology for his help in choosing a nice set of illustrations It was a difficult task The illustrations had to be both instructive and attractive and they had to illustrate the history of science as well as the general background of ancient civilization The publisher encouraged us to find better and still better illustrations and he ordered photographs from all over the world with never failing energy and enthusiasm Mr Beyen's highly instructive subscripts will help the reader to see the inter relation between way of living art and science of the ancient world Thanks are due to many correspondents who have suggested additions and pointed out errors Sections on Astrolabes and Stereographic Projection and on Archimedes construction of the heptagon have been added The sections on Perspective and on the Anaphorai of Hypsicles have been enlarged In the second English edition I have incorporated an important discovery of P Huber which sheds new light upon the role of geometry In Babylonian algebra see p 73 The section on Heron's Metrics see p 277 was written anew following a suggestion of E M Bruins Zurich 1961 B L
