You can develop a successful practice while providing a much needed service by bucking this trend. Jeffrey Sedgewick O.D., M.D. spent 4 years as a practicing optometrist prior to entering medical school. While practicing as an optometrist and as an ophthalmologist, he has seen many examples of poor medical care by optometrists himself included. He is convinced that it doesn't have to be this way. He believes optometrists who start their own Medical Optometry Practice can fill an increasingly important function, but they need more knowledge and clinical experience, which he seeks to provide in this textbook.
