New Approaches to Ruskin, 2016 **New Approaches to Ruskin (Routledge Revivals)** Robert Hewison, 2014-11-13

The study of Ruskin's work and influence is now a feature of several critical disciplines. New Approaches to Ruskin, first published in 1981, reflects this gathering some of the most distinguished writers on Ruskin and joining them with others who have undertaken significant research in the field of Ruskin studies. The authors were all specially commissioned for this volume and were chosen to represent as wide a variety of approaches as possible to this key figure of nineteenth-century culture. This book is ideal for students of art history.

Work and Wealth (Routledge Revivals) J. A. Hobson, 2010-10-04
First published in 1914 and reissued with a new introduction in 1992, *Work and Wealth* is a seminal vision of Hobson's liberal utopian ideals which desired to demonstrate how economic and social reform could transform existing society into one in which the majority of the population, as opposed to a small elite, could find fulfillment. Hobson attacked conventional economic wisdom which made a division between the cost of production and the utility derived from consumption. Far from being necessarily arduous, Hobson argued that work had the potential to bring about immense utility and enrichment. The qualitative humanist work argues in favour of a new form of capitalism to minimise cost and maximise utility.

Culture, Participation and Policy in the Municipal Public Park Abigail Gilmore, 2024-01-12
This book concerns the values and practices of participation in municipal public parks and the connections they have with cultural policy, urbanism and social life. Adopting a critical cultural policy lens, it identifies the park as a mundane but extraordinarily treasured place for the production and exchange of cultural values, regulation, resistance and the practising of citizenship. Drawing on extensive mixed methods research on everyday participation in diverse local cultural ecosystems in England and Scotland, the book examines the social lives of parks and their users and the important public values that are generated through their common stewardship and usership. It presents case studies of parks and co-located museums as cultural public spheres which promote both commoning and commodification. These are contextualized by histories of municipal parkmaking from the nineteenth century to the present and related to the making of local government and other civic and cultural institutions. The book highlights contemporary issues of austerity, marketisation and de-municipalisation within local government in the context of urban development. It positions the public park as fundamental to democratic cultural governance and makes the case for the primacy of public trust, ownership and park equity in safeguarding the right to the city.

The Vital Science (Routledge Revivals) Peter Morton,2014-08-01 In this title first published in 1984 Peter Morton argues that in late Victorian Britain a group of novelists and essayists quite consciously sought and found ideas in post Darwinian biology that were susceptible to imaginative transformation The period between 1860 and 1900 was a time of great confusion in biology the natural selection hypothesis was in retreat before its acute critics and no extension of evolutionary theory to human affairs was too bizarre to attract its quota of enthusiasts Writers capitalised on this prevailing uncertainty and used it to their own artistic or polemic ends A fascinating and interdisciplinary title this reissue will interest students of late Victorian literature as well as historians of biological theory between The Origin of Species and Mendel
