

PARKING MOTORCYCLE

Use the side stand to keep the machine in self-supporting position.

⚠ CAUTION:

Don't lay the machine down on the ground or gasoline and engine oil may spill out.

⚠ WARNING:

The muffler and exhaust pipe become very hot during and after operation. Avoid burns by being careful not to touch these parts. Park the motorcycle where others are not likely to touch it.

ADVICE TO THE PARENT:

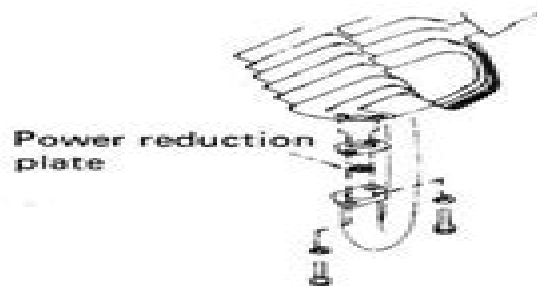

It takes some time for engine and muffler to cool off after a long ride. Caution the young rider of the hazard: a number of adults have burned their hands by touching a hot engine or muffler.

THE

POWER PLATE

REDUCTION

NOTE: A power reduction plate is installed inside the exhaust flange to ensure safe operation by young riders.

The power reduction plate restricts the exhaust flow and thus reduces the power output of the engine. This enables the young rider to develop his riding skills gradually with reduced power output. Removal of this plate allows the engine to deliver full power.

⚠ WARNING:

The power reduction plate should only be removed, when in the judgment of the parents, the rider has developed sufficient skills to be able to safely operate the machine with the plate removed.
