THE APOLLO MOON MISSIONS Randy Walsh, 2019-09-18 As a child I was fascinated by the Apollo Moon missions As I got older the fascination never waned until approximately 15 years ago I happened to watch a documentary on one of the Apollo missions In that they discussed the method used for circumnavigating the Moon during the missions As a trained pilot I remember questioning that method of navigation and from there I started to doubt the validity of the Apollo Moon missions itself which led to subsequent years of research This book is culmination of that research and the

reasons why I believe that the Apollo Moon missions were faked Included in Part 1 of this series I discuss the following key factors The Saturn V rocket and the fraudulent claims on the powerful F 1 engines without which the Apollo landings could not have taken place The non existent capabilities of the Apollo guidance computer and the fact that this computer was a fake The conflicting and contradictory information regarding the radiation intensity between the Earth and Moon which would have prevented any manned lunar landing The inadequate shielding for both the Command Module and Lunar Module which would have ended any manned mission outside of Low Earth Orbit in a matter of minutes if not seconds And the incomplete missing and or destroyed documents along with the thousands of missing reels of telemetry tapes containing data that has been lost forever The Solar System 2 Therese Encrenaz,James Lequeux,2021-12-29 This book presents a global
