Presidential Campaigning in the Internet Age Jennifer Stromer-Galley, 2019 As the plugged in presidential campaign has arguably reached maturity Presidential Campaigning in the Internet Age challenges popular claims about the democratizing effect of Digital Communication Technologies DCTs Analyzing campaign strategies structures and tactics from the past six presidential election cycles Stromer Galley reveals how for all their vaunted inclusivity and tantalizing promise of increased two way communication between candidates and the individuals who support them DCTs have done little to change the fundamental dynamics of campaigns The expansion of new technologies has presented candidates with greater opportunities to micro target potential voters cheaper and easier ways to raise money and faster and more innovative ways to respond to opponents The need for communication control and management however has made campaigns slow and loathe to experiment with truly interactive internet communication technologies Citizen involvement in the campaign historically has been and as this book shows continues to be a means to an end winning the election for the candidate For all the proliferation of apps to download polls to click videos to watch and messages to forward the decidedly undemocratic view of controlled interactivity is how most campaigns continue to operate In the fully revised second edition Presidential Campaigning in the Internet Age examines election cycles from 1996 when the World Wide Web was first used for presidential campaigning through 2016 when campaigns had the full power of advertising on social media sites As the book charts changes in internet communication technologies it shows how even as campaigns have moved from a mass mediated to a networked paradigm the possibilities these shifts in interactivity seem to promise for citizen input and empowerment remain farther than a click away *Mental Health in the Digital Age* Dr Elias

Fresh Expressions in a Digital Age Michael Adam Beck, Rosario Picardo, 2021-01-19 *Fresh Expressions* is a canary in the coal mine alerting congregations to reevaluate what the Church is, where and when it can happen, and who can lead it. Church, as we know it, is inaccessible to most people. A fundamental premise of the movement is that Church can become accessible again by emerging in every nook and cranny where life already happens. *Fresh Expressions* is based in simplification, returning to basic scriptural principles and a recovery of a priesthood of all believers in the three places where people live and relate to others: First Place, The home or primary place of residence; Second Place, The workplace or school place; Third Place, The public places separate from the two usual social environments of home and workplace, which host regular, voluntary, informal and neutral spaces of communion and play. Examples are environments such as cafes, pubs, theaters, parks, and so on. During a pandemic, our two primary mission spaces were closed off; the second and third places were shut down. We couldn't have Tattoo Parlor Church; the tattoo parlor was closed. We couldn't gather in Moe's Southwest Grill for Burritos and Bibles; they were doing take out only. The dog park was empty; no Paws of Praise. This limited us to the only spaces we have left: the first place or the home place, The digital place or the space of flows. This forces us into recognizing the digital space as its own kind of third place, a new missional frontier.
