Neue Grafik New Graphic Design Graphisme Actuel 1958 1965:

New Graphic Design: Graphisme Actuel, 1958-1965 Lars Müller, 2015-02-18 Neue Grafik the International Review of graphic design and related subjects was initiated by designer Josef Müller Brockmann and published in eighteen issues between 1958 and 1965 by an editorial collective consisting of him Richard Paul Lohse Hans Neuburg und Carlo Vivarelli LMNV The complete volumes are now available in an excellent facsimile reprint from Lars Müller Publishers From a historical point of view Neue Grafik can be seen as a programmatic platform and effective publishing organ of Swiss graphic design an international authority in its field at the time Protagonists of the Swiss school and its rigorous Zurich faction lead an essential discourse on the foundations of current communication and constructive design The influence of this movement cannot be over stated The Swiss school also called International Style became exemplary for the conceptual approach to corporate design of increasingly globally operating corporations and an influential precursor in the design of individual projects such as posters exhibitions and publications Neue Grafik is an important point of reference in the recent history of graphic design After the heights of the digital revolution now follows a renewed concern for matter of fact concepts and clear form languages This explains the interest in the almost fundamentalist stance of the four Zurich based designers who were responsible for the content of the magazine

Materials extend from historical studies of design to textbooks and manuals of professional practice to theoretical works relating to design drawn from disciplines such as psychology and communication theory. The 1,100 entries include reference sources, books, periodical articles, catalogs, films, and electronic data. Among the topics covered are general reference, design theory and history, education and career guides, professional practice, production and layout, typography, calligraphy, color reproduction, caricature, and photo illustrations, as well as applications in advertising, publication design, corporate identity programs, information graphics, package design, posters, and signs. Literature on computer technology as used in desktop publishing and computer graphics is also included. Appendixes provide annotated listings of almost 200 relevant annuals and serials, as well as a directory of associations and organizations in the field. Access to titles, authors, and a finer breakdown of subjects is facilitated by thorough indexing.
